ZINNIA FANTASY

J. J. H. GREGORY & SON
Marblehead, Mass.

. This is Our Eighty-first Year in Business .

VARIETIES OF FLOWERS

DESCRIBED ON THIS PAGE

Are of recent introduction. Five packets, your selection, are given FREE with orders for Flower and Vegetable Seeds amounting to \$2.50.

Ten packets, your selection, given FREE with orders of \$5.00 and over.

1 PENTSETEMON SENSATION IMPROVED

Gloxinia like flowers of varying colors. Perennial in warm sections, excellent for cutting purposes, as a bedding plant ranks with Petunia, Phlox, etc. Grows 30 inches high. Pkt. 15c.

2 PETUNIA STAR OF CALIFORNIA

The flowers are velvety violet with a touch of crimson starred with five pure white blotches. Flowers quite large. Pkt. 15c., 3 pkts. 35c.

3 MARIGOLD ORANGE ALL-DOUBLE

We have a strain of marigold which has come one hundred per cent double for the past two years. Pkt. 15c., 3 pkts. 40c.

4 NEW POPPY SHIRLEY DOUBLE BEGONIA FLOWERED SWEET BRIAR

We now offer this most beautiful color in a Begonia Flowered Double type which is named Sweet Briar. A delightful shade of deep rose pink. The flowers are full double. Price per pkt. 15c., 3 pkts. 40c.

5 ASTER GIANT SUNSHINE

The plants grow 3 feet high and bear blossoms 5 to 6 inches across on long stiff stems. In color the lovely dual-tone effect beggars description. The disk is a lovely light yellow and the encircling guard petals are varying shades of pink, rose, blue and lavender. Price per pkt. 15c., 3 pkts. 35c.

6 MARIGOLD LEMON ALL-DOUBLE

Those plants in our garden did not produce any singles. They were profuse bloomers. When placed in a vase in the house, if the water is changed each day they will last ten days. Price per pkt. 15c., 3 pkts. 35c.

7 ASTER GIANT PEONY FLOWERED

Enormous flowers growing three feet high very double on strong stems in a variety of color in delicate shades mixed. Price per pkt. 15c., 3 pkts. 35c.

8 ANNUAL CANTERBURY BELLS

Seed planted in February blooms in July. Many years of careful selection have at last given us Our Annual Canterbury Bell which blooms from seed in six months. Plant grows from two to two and a half feet tall, each plant having from six to eight spikes of bloom. Mixed. Price per pkt. 15c., 3 pkts. 35c.

9 CALENDULA RADIO

The Radio is a globular type with beautifully quilled petals, color a deep yellow. Flowers borne on long stout stems. Pkt. 15c., oz. 30c.

10 SCABIOSA GIANT MIXED

Easily grown snowv annuals, delights in a sunny location grows from two to three feet high. Flowers double and in a great variety of color; black, red, rose, sulphur, yellow, peach blossom, white and salmon rose. Very desirable for cut flowers, sweet scented. Price per pkt. 15c., 3 pkts. 35c.

11 ZINNIA SCABIOSA FLOWERED

Plants grow 2½ to 3 feet high, bearing numerous medium sized flowers remarkably resembling the annual Scabiosa. Colors include Crimson, Scarlet, Orange, Yellow Pink and White. Mixed colors, Pkt. 15c., 3 pkts. 35c.

12 ASTER GOLDEN SHEAF

The deepest yellow Aster yet offered, and the only one that is wilt-resistant. The flowers are fully double, with an attractive crest-like center, of good substance and fine depth of petal. It has all the characteristics of the Aurora type of Aster so popular now with florists. The flowers last well when cut, and are excellent shippers. Pkt. 15c., 3 Pkts. 35c.

13 CALENDULA CHRYSANTHA

Distinct in type which is outstanding among all varieties known up to the present time. The large double flowers are an exquisite shade of clear buttercup yellow with long loosely arranged petals which droop somewhat to give the rounded appearance of a chrysanthemum—having long, stiff stems, making it ideal for cutting. Pkt. 15c., 3 Pkts. 35c.

14 ASTER SUPERB GIANT LOS ANGELES

(Award of Merit, All American Selection, 1934).

This is the largest and most fully double Aster known. The flowers are from 6 to 8 inches across, full petaled and artistically graceful in the feathery effect of the interlacing ostrich feature type petals. The color is a lovely soft shell pink blending in a creamy pink at the center. Plants reach a height of 2½ to 3 feet with 6 to 8 non-lateral stems per plant. For those who want the finest Aster yet developed we heartily recommend Los Angeles. Pkt. 15c., 3 Pkts. 35c.

15 ZINNIA FANTASY

Ideally suited for any decorative use, the rounded, medium-sized shaggy flowers are borne profusely on 2½ to 3 foot plants in a wide and varied range of colors which include the brightest shades of red, yellow and orange, as well as the popular pastel pinks and creams. Pkt. 15c., 3 pkts. 35c.

OUR EIGHTY-FIRST ANNIVERSARY

1856 GREGORY'S HONEST SEED 1937

PLACE your orders early so as not to be disappointed. We have made our prices as low as it is possible for the high quality stocks that we handle.

The farmer is the mainstay of our country. We depend upon him for our existence. Vegetables brought better prices in 1936 so this helped the farmer to make up part of the losses of previous years. Due to shortages, some items are higher in price and may be exhausted before planting time.

Another winter is with us. What have you done to better your conditions? Did you make the most of your garden the past summer? Are the shelves of your store room stocked with canned vegetables and fruits? If not, Why Not? Now is the time to make arrangements for 1937. It is surprising how much one can produce from a small piece of ground. Please refer to our planting table on page 2. Some of our customers have informed us that if it were not for their garden they could not have existed throughout the summer and winter without calling upon their towns for help.

Gregory's Honest Seeds with 81 years of experience back of them produce vegetables of the best quality. Devote a section of your garden to flowers. On second and fourth cover pages we have described and illustrated the best of the later introductions and you can make a selection from these without additional cost when you place your order according to Gregory's Free Flower Seed Offer given below.

GREGORY'S FREE FLOWER SEED OFFER

If your order for vegetable and flower seed amounts to \$2.50, you may select one packet of any five varieties described on second page of cover (5 pkts. in all).

If your order for vegetable and flower seed amounts to \$5.00 or over, you may select one package each of the ten varieties described on second page of cover (10 pkts. in all). Or you may select any other variety of flower seed listed in our catalogue in place of those described on second cover page.

You can assist us by calling this offer to the attention of your friends.

GREGORY'S GUARANTEE

- 1st. That all seeds shall reach our customer in good condition.
- 2d. We guarantee the vitality and purity of our seeds to the full amount of the purchase price. Your money back within one year if you are not satisfied with results.
- 3d. It is agreed that in no case shall J. J. H. Gregory & Son be liable for more than the purchase price of the seed.

Very sincerely yours,

J. J. H. GREGORY & SON

DIRECTIONS HOW TO ORDER AND OUR WARRANTY

GREGORY PAYS THE FREIGHT

On all Vegetable and Flower Seeds listed in this catalogue to all points in the United States, East of the Mississippi. We also deliver all LAWN GRASS SEED MIXTURES.

Items that we do not deliver free we ship by express or freight not prepaid. If these items are wanted by mail, please include postage at zone rates. In making this free delivery offer we reserve the right to ship goods by Parcel Post, Express or Freight.

SIGN YOUR NAME TO ALL ORDERS AND LETTERS

Order by number as well as name.

PAYMENT FOR SEED. Cash should accompany all orders. We would advise our customers not to order their seed C.O.D. as you have to pay the cost of collection and return charges.

GREGORY'S GUARANTEE

1st. That all seeds shall reach our customers in good condition.

2nd. We guarantee the vitality and purity of our seeds to the full amount of the purchase price, your money back within one year if you are not satisfied with the results.

3rd. It is agreed that in no case shall J. J. H. Gregory & Son, be liable for more than the purchase price of the seed.

Most of the failures with seeds, plants and bulbs are due to causes entirely beyond our control, such as unfavorable weather or soil conditions; too deep or too shallow planting, fertilizer allowed to come in contact with the small rootlets, etc.

It must be plain to everyone who gives this matter the slightest thought that it is to our best interests to send out only such stock as will not only grow but prove true to name and description.

WE ARE RESPONSIBLE FOR all money sent for seeds over one dollar, if sent by Post Office Order on Marblehead, Express Money Order, Registered Letter, Draft or Cashier's Check.

ALL SEEDS ARE TESTED for germination and must come up to our critical standard of Honest Seeds or they are not sent out.

Prices subject to change without notice.

NEW AND SPECIAL VARIETIES IN VEGETABLES FOR 1937

Each year more and more planters are beginning to realize that it pays to try "new" things rather than to be satisfied with so-called old standbys. Great improvements are being made by conscientious plant breeders on nearly all standard varieties of vegetables and flowers. We test

nearly all of them, and those which we recognize as being distinct improvements over old sorts or strains are offered to our customers in the following pages. We would not offer them to you if we did not feel confident that they would please you, as well as prove profitable to you.

FLORIDA GOLDEN CELERY

This new variety has most of the characteristics of Golden Plume or Wonderful, but it has greater height and weight of plant, and the edible portion of the stem is larger; in Florida it grows 22 to 24 inches. The stems are broad, thick and solid; the plants are full hearted and very compact. Pkt. 10c., 1/2 oz. 75c., 1 oz. \$1.25.

GOLDEN DETROIT CELERY

This is a pure line selection of the Dwarf Golden Self Blanching type which emphasizes the good points of that variety and eliminates the faults. The plants are heavy, very compact, and full hearted. Plants grow 22 to 23 inches high. The stems are broad, very thick, and rounded at the edges, and the edible portion is 7 to 8 inches long.

Pkt. 10c., 1/2 oz. 75c., 1 oz. \$1.25.

SWEET SPANISH ONION

This Riverside Strain is becoming very popular due to its large size globe shaped yellowish brown color of excellent flavor. Some bulbs weight two pounds under good conditions. They keep well.

Pkt. 10c., oz. 40c., 1/4 lb. \$1.25, Postpaid.

PERFECTION CORELESS CARROT

A long stump rooted variety 8 to 9 inches long, very uniform, deep red color and a big cropper. An excellent variety to store for winter use. Pkg. 10c., oz. 20c., 1/4 lb. 50c., lb. \$1.50, postpaid.

CORELESS FORCING CARROT

The finest sweetest and tenderest Carrot for forcing. A popular variety with Holland gardeners, can be sown early, roots half long, coreless with stump end, small top and fine tap root. Pkt. 10c., oz. 20c., 1/4 lb. 50c., lb. \$1.50 postpaid.

"GOOD FOR ALL" BEET

Shows very definite advantages as a canning and pickling beet. The roots are very smooth and refined and very even in size and shape, which is almost perfectly globular. Desirable for canning whole at 1 1/4 to 1 1/2 inches diameter. Price per pkt., 10c., 1 oz. 15c., 1/4 lb. 30c., 1 lb. \$1.00

PERFECTION CORELESS CARROT

Coreless Forcing Carrot

NEW GREGORY TOMATO

**Earliest Tomato
Ever Introduced**

**15 Days Earlier than Burbank
RIPE TOMATOES IN 100 DAYS**

Seeds were sown in the greenhouse. April 15, transplanted into two-inch pots and carried along in a hotbed until the weather was suitable for setting out. The first ripe fruit was picked July 28, 104 days from the sowing of the seed. Had the plants been forced, they would have borne in less than 100 days.

Pkt. 15c., 1/4 oz. 75c., 1/2 oz. \$1.35.

THE LAWN

In making a lawn, much future trouble will be avoided if the preparatory work is carefully and thoroughly done. It is very essential that you have a good depth of surface soil and proper drainage. There should be no less than a foot in depth of good loam, two feet would be better; if the soil is of a sandy nature the grass is apt to burn out in hot, dry weather.

The seed may be sown with success at any time, from April to August, though the best time is during April and May. When your land is ready to receive the seed select a time when the weather is calm. If planted on a windy

day the seed would scatter so unevenly the results would be very unsatisfactory. Just as soon as the grass gets started nicely, and it is 3 to 4 in. tall, run the lawn mower over it, being careful not to cut too close. Continue the mowings at intervals of about ten days. When the lawn is well established, frequent rollings are beneficial, especially in the spring. Sheep Manure (see 3d cover) makes an excellent fertilizer for lawns. Use at the rate of 100 pounds to every 1,000 square feet. To stimulate the growth of grass of an old lawn use 1 pound to every 30 square feet; should be applied two or three times during the season. Apply just before watering and keep moist for several days.

GREGORY'S SPECIAL LAWN GRASS SEED

We only handle one grade — THE BEST

One pound will sow a space 10 x 20 feet (200 square feet); 100 to 150 pounds is sufficient to sow one acre.

We purchase only the purest and very best of the fancy recleaned grasses, make our own mixture from a formula that we have found, after years of experimenting, to give the best results. **Price per lb., postpaid, 45c., 5 lbs. \$1.75, 10 lbs. \$3.25, 20 lbs. \$6.00, freight paid.**

FOR SHADY SPOTS

Our Lawn Grass for Shady Spots contains grasses best adapted for such places. It will produce an abundant and even growth of beautiful green grass. **Price per lb. 50c., postpaid; 5 lbs. \$2.00, 10 lbs. \$3.75, 20 lbs. \$7.00.**

TIMOTHY (HERDS' GRASS)

1243 Blooms in June and July. We sell only recleaned high grade stock. Weight 45 lbs. per bushel. **Price: lb. 30c., postpaid; 15 lbs., \$2.50, 45 lbs. \$9.00, express not paid.**

RED CLOVER (MEDIUM RED)

1244 The principal clover used for general use. Weight 60 lbs. per bushel. **Price: lb. 60c., postpaid; 15 lbs. \$7.50, 60 lbs. \$28.50, express not paid.**

DWARF ESSEX RAPE

1270 **Price: lb. 20c., 3 lbs. by mail, 45c., 10 lbs. \$1.20, 25 lbs. \$2.75, express not paid.**

KENTUCKY BLUE GRASS.

1291 Grows very luxuriantly producing excellent food for cattle. One of the most valuable grasses used in lawn mixtures. **Price: lb. 45c., 5 lbs. \$2.00, postpaid.**

WHITE DUTCH LAWN CLOVER

Splendid for sowing among grass on lawns and other places where a thick, quick growth is desired, especially adapted for seashore lawns. Use 1 oz. to each 2 lbs. of grass seed. **Per oz. 10c., 1/4 lb. 20c., 1/2 lb. 35c., 1 lb. 60c.**

RED TOP (FANCY RECLEANED)

1246 Used extensively as a permanent grass, one of the best for cattle feeding. Valuable for wet soils. **lb. 45c., postpaid; 5 lbs. \$2.00, 10 lbs. \$3.50, freight paid.**

ALSIKE CLOVER

1280 Finer and more leafy than Red Clover. The hardiest of all clovers. Weight 60 lbs. per bushel. **Price: lb. 55c., postpaid; 15 lbs. \$7.00, 60 lbs., \$28.00, express not paid.**

BOKAHANA OR WHITE SWEET CLOVER

1266 A great soil builder and pasture crop. Grows on most all soils and does well when Red Clover and Alfalfa fail. Green sweet clover excellent feed for cattle. Weight 60 lbs. per bushel. **Price: lb. 30c., postpaid; 15 lbs. \$2.75, 60 lbs. \$9.00, express not paid.**

GRIMM ALFALFA

1261 Hardest and most productive of all varieties. **Price: lb. 70c., postpaid; 15 lbs. \$7.00, express not paid.**

Our Lawn Mixtures are all made from Recleaned Fancy Grasses

Prices subject to change without notice.

General List of Gregory's Honest Seeds

We pay postage on all quantities up to and including two pounds at postpaid prices. We prepay freight except when noted.
(Prices subject to change without notice.)

ASPARAGUS SEED AND ROOTS

Strong, One Year Old Roots, Giant Rust Proof. Mary Washington. 50 roots \$1.00 postpaid, 100 roots, \$1.75, postpaid, 1000 roots by freight, prepaid \$11.00

CULTURE — Sow the seed in the seed-bed late in the fall or in the early spring as soon as the ground can be worked, in drills 1 foot apart, covering the seed about 1 inch deep. Thin the plants to 3 inches in the row. The roots may be removed to the permanent bed when one or two years old.

The months of April and May are the best months to undertake new plantings of Asparagus. Success depends more on location, condition and preparation of the land than it does on the variety. Select land that lies somewhat low, but is well drained and not subject to overflow after heavy rains or spring thaws. Land naturally sandy is preferred to soggy and heavy clay. Ten cords of stable manure well ploughed under and thoroughly mixed with the soil is ample per acre. Land should be ploughed deep and thoroughly pulverized. Make

Mary Washington
Asparagus

the furrows 4 feet apart and set the roots 1 foot apart in the row. The crowns of the plants should be set so that they will be at least 4 inches under the surface of the land when level. The top of the plant should rest on a little cone of soil.

Experienced asparagus growers claim that one year roots give the best results; where one expects a bed to last many years it is essential that they start right.

GIANT RUST PROOF, MARY WASHINGTON

15 Experiments were carried on for the purpose of breeding a rust-resistant strain of asparagus. The result is a strong, vigorous growing variety with very strong rust proof characteristics. Pkt. 15c., oz. 25c., ¼ lb. 40c., 1 lb. 90c.

NICHOLAS FROST, LACONIA, N. H., writes:—Every seed I planted last spring was from your house and I think every seed gave an account of itself. The result has been very satisfactory to me. I do not know whether you make any claim that your Gregory's Surprise and Gregory's Excelsior Peas are free from blight, but while all about here the pea vines were attacked, mine had no blight and yielded abundantly. My squash vines promise a good yield of marketable squashes, some of them very large. In my tract of Dunlaps Marrows there are several that measure 50 inches and still growing.

BEANS

DWARF, SNAP or BUSH — GREEN PODDED SORTS

ONE PACKET CONTAINS ABOUT 150 SEED AND WILL PLANT 25 FEET OF ROW
WE PAY POSTAGE ON BEANS EXCEPT WHEN OTHERWISE NOTED

CULTURE. Select light, warm soil, and plant when danger from frost is past in the spring, in drills 2½ to 3 feet apart, dropping the beans about 2 inches apart in the drill, and covering 1 inch deep. To obtain a continuous supply of beans make plantings every two weeks from May 1 until the middle of August. Keep the ground clean and loose by frequent hoeing, but do not draw the earth around the plants. Avoid working among the vines when they are wet, as it will tend to make them rust. Two pounds to 150 feet of drill. To prevent rust and destroy insects spray with "Pyrox" and use a Sprayer. (See PAGES DESCRIBING INSECTICIDES AND IMPLEMENTS.)

BOUNTIFUL GREEN

30 42 days. A tremendous cropper, the finest flat, Green-podded Bean yet introduced. Planted May 29, commenced picking July 18, securing 4 quarts from 10 feet of row. Extremely early, entirely stringless and of superior quality.

LOW'S CHAMPION

40 50 days. This green-podded Bush Bean resembles the Warren. Being entirely stringless it is extremely tender and of exquisite flavor as a string Bean. The pods contain from five to eight beans each; used extensively for canning. A favorite on account of its rust-resisting qualities.

BURPEE'S STRINGLESS GREEN POD

45 42 days. Remarkably early, pods and beans large. The earliest round-podded green bush Bean, bearing larger pods than those of Red Valentine.

GIANT STRINGLESS GREEN POD

50 45 days. The plants are of strong growth, very productive, pods 5 inches long, light green, slightly curved, very meaty, being broadly rounded, saddle-backed and absolutely stringless.

TENDERGREEN

55 Delicious, tender, fine flavored stringless, early. Pods long (6 inches) round as a pencil, very meaty and of light green color. An excellent cropper.

FULL MEASURE

60 Round thick pods, prolific, medium, early, fine quality. Continues in bearing a long time—stringless, excellent for home garden.

EXTRA EARLY REFUGEE, (1000 TO 1)

65 42 days. Round Pod ten days earlier than its late brother. Hardy and very prolific green pod. Prices for any of the above varieties: Pkt. 10c., ½ lb. 25c., 1 lb. 35c., 2 lbs. 65c., postpaid; by freight, prepaid, 5 lbs. \$1.35, 10 lbs., \$2.25, 15 lbs., \$3.00, 30 lbs. \$5.50, 60 lbs., \$10.00.

SPRAY YOUR BEANS

To check disease spray with BORDEAUX MIXTURE. RED ARROW is most effective against the Mexican June Beetle. (See page 37.)

WAX-PODDED BUSH BEANS

GREGORY PAYS THE FREIGHT

Prices Subject to Change

NEW KIDNEY WAX BEANS

28 One of the finest of recent introductions in Beans. The healthy plants are blight and rust resisting, bearing their loads of handsome pods very early in the season.

Pods are flat, bright yellow, very straight and handsome, always stringless and brittle at all stages of growth. Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 35c., 2 lbs. 65c., postpaid; by freight prepaid, 5 lbs. \$1.25, 10 lbs. \$2.25, 15 lbs. \$3.00, 30 lbs. \$5.00, 60 lbs. \$9.00.

CRACKER JACK WAX

102 42 days. Early as the Wardwell's Kidney Wax, very vigorous, healthy and wonderfully productive. It will produce 50 per cent. more pods than any other wax variety. Has broad, flat, golden yellow pods, entirely free from strings.

Pods fit to eat in about 40 days.

WARDWELL'S KIDNEY WAX

105 42 days. Extremely early, with very long tender, stringless pods, a prolific bearer. It is used for late as well as early planting.

GOLDEN QUEEN, OR HODSON WAX

110 60 days. A rust-proof Wax Bean. Healthy vines which hang filled with a wonderful crop of long, straight pods 6 to 7 inches in length. It is medium late.

KEENEY'S RUSTLESS GOLDEN WAX

120 50 days. All Wax Beans are more or less subject to rust, which spoils them for market use. Keeney's is a sport from the Golden Wax, that excels in its comparative freedom from rust. A tremendous cropper, the vines, being literally loaded with delicious, tender pods, $4\frac{1}{2}$ to 5 in. long

EXTRA EARLY REFUGEE WAX

145 Yields immensely, perfectly stringless. Round pods. Does not rust.

SURE CROP STRINGLESS WAX

155 42 days. (Best Black Wax sent out). Heaviest yielder of all Wax Beans, with rich yellow pods, slightly curved, averaging 6 to 7 inches in length, almost round, stringless at all stages.

Cracker Jack Wax Prices for the above varieties
pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 35c.,
2 lbs. 65c., postpaid; freight prepaid, 5 lbs. \$1.25, 10
lbs. \$2.25, 15 lbs. \$3.00, 30 lbs. \$5.00, 60 lbs. \$9.00.

RED KIDNEY

160 A standard red field sort; fine for baking. Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; freight prepaid, 5 lbs. \$1.25, 10 lbs. \$2.25.

SNOWFLAKE FIELD

165 The very best small Pea Bean known. Dry beans eighty days from time of planting. Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 65c., postpaid; freight prepaid, 5 lbs. \$1.25, 10 lbs. \$2.25.

New Kidney Wax Beans

IMPROVED YELLOW EYE

170 One of the best varieties for baking, remarkably vigorous and prolific. Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 35c., 2 lbs. 65c., postpaid; freight prepaid, 5 lbs. \$1.25, 10 lbs. \$2.25.

BUSH LIMA BEANS

Don't plant Lima Beans in cold, moist soil, they need warm soil.

BURPEE IMPROVED

180 80 days. The earliest and large podded Bush Limas, bearing pods almost equal in size to those of the large Pole Limas. Pods average 5 to 6 inches long and contain 4 to 5 large, thick, green beans of delightful quality. Plants are of sturdy, upright growth and bear pods in large clusters. Pkt. 15c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight prepaid, 5 lbs. \$1.40, 10 lbs. \$2.60,

FORDHOOK

185 75 days. Beans and pods large, but the bushes are of erect growth, bearing their abundance of pods well above the ground. Clusters of 4 to 6 pods are common. Beans are green thin-skinned and of really delicious quality. Pkt. 15c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight prepaid, 5 lbs. \$1.40, 10 lbs. \$2.60, 15 lbs., \$3.50.

StimUplanT
Makes a
Wonder Garden

BUSH SHELL BEANS

EARLY CARMINE PODDED DWARF HORTICULTURAL

80 Earliest Horticultural Bush Bean; very rich carmine pods; the most attractive Bean of its class. Can be used early as a green pod snap Bean. Quality excellent. Pkt. 15c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight prepaid, 5 lbs. \$1.65, 10 lbs. \$2.35, 15 lbs. \$3.25, 30 lbs. \$6.50.

GREGORY'S RUST-PROOF INTERMEDIATE HORTICULTURAL

90 Our customers are very enthusiastic in their praises over this Bean. Pods remarkably large, many containing seven beans. Color very bright and attractive. Plants healthy, vigorous and productive. It never has been known to blight. Planted May 10, you can commence picking July 20. Sends out more or less tendrils as do most Horticulturals. Pkt. 15c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 75c., postpaid; by freight prepaid, 5 lbs. \$1.75, 15 lbs. \$4.50, 30 lbs. \$8.00, 60 lbs. \$14.00.

KILL RATS

and Mice

Harmless to children, baby chicks, cats, dogs and all domestic animals, but deadly to rats and mice. 50 cents per box, postpaid.

NON-POISONOUS

POLE BEANS

CULTURE. Set the poles 3 or 4 feet apart, and plant 6 to 8 beans around each pole, thinning to four healthy plants. They require the same soil and treatment as the dwarf varieties, with the exception that they crave stronger soil and do best in a sheltered location. One quart to 150 poles.

BURGER'S STRINGLESS GREEN POD

200 (SEE ILLUSTRATION). (Often called White Kentucky Wonder on account of having a white seed). Decidedly earlier than Kentucky Wonder. Pods uniform in size, very long, moderately curved, creased back, dark green in color, extremely brittle, stringless of excellent quality and free from disease; pods $6\frac{1}{4}$ to 8 inches entirely stringless at all stages of growth. Dry beans excellent for baking in the winter.

Burger's Stringless Green
Pod Pole Beans

SCARLET RUNNER

230 Ornamental bright red flowers; good snap Bean. Prices for the above varieties: Pkt. 15c., $\frac{1}{2}$ lb. 25c., 1 lb. 35c., 2 lbs. 60c., postpaid; freight prepaid, 5 lbs. \$1.15, 10 lbs. \$2.05.

Gregory's Improved Crosby's Egyptian Beet

KENTUCKY WONDER

205 Long, round green podded; a tremendous cropper.

MAMMOTH HORTICUL- TURAL

210 Our clerk who visited a large plantation of this Bean said it was the handsomest sight in Beans he ever saw. Thousands of poles were literally covered from top to bottom with extra large, carmine-colored pods.

LONDON HORTICUL- TURAL

225 Pods striped, with red, fine, string or shell.

WAX PODDED SORTS

KENTUCKY WONDER WAX POLE

235 We have here a variety with all its superb qualities of the Green Pod variety except that it is of a beautiful transparent yellow color. It is a rampant grower. Pods are solidly meaty, entirely stringless, and when cooked, deliciously rich and buttery.

GOLDEN CLUSTER WAX

240 Early, very prolific, very handsome; in fact, very first-class, a standard.

PRICES OF THE ABOVE VARIETIES: Pkt. 15c., $\frac{1}{2}$ lb. 25c., 1 lb. 40c., 2 lbs. 70c, postpaid; by freight prepaid, 5 lbs. \$1.25.

POLE LIMA BEANS

NEW GIANT PODDED PROLIFIC

245 90 days. Grows green, keeps green, and the only Lima Bean that is absolutely green when dried. More productive than any other Pole Lima we have ever seen grown. Large pods hang in clusters of from five to eight making them easy to gather, each having 5 to 6 beans in pod. Pkt. 15c., $\frac{1}{2}$ lb. 25c., 1 lb. 40c., 2 lbs. 75c., postpaid.

EARLY LEVIATHAN

250 85 days. The very earliest of all Pole Limas. Seed sown end of May will produce plants which by middle of August are literally loaded with clusters of handsome pods. Leviathan bears long, straight pods, containing four to five large beans. Quality the very best.

KING OF THE GARDEN

255 90 days. For many years this has been the standard late Pole Lima. Plants are exceedingly vigorous, and no more than two should be allowed to grow to a pole. Beans are borne in clusters.

Prices for above varieties: Pkt. 15c., $\frac{1}{2}$ lb. 25c., 1 lb. 40c., 2 lbs. 70c., postpaid.

ASPARAGUS BEAN GIANT PODDED OR YARD LONG PODS

Large and fleshy, stringless, tender and brittle and as a snap bean has a delicate and very delicious flavor not found in ordinary string beans. Fine for shelling green or for winter use when dry. Drought resistant and easily grown, elongated pods 2 to 3 feet long. Price per pkt. 15c., 3 pkt. 40c.

BEETS TABLE VARIETIES

Culture. Select a deep, rich loam and manure with well-decomposed compost. Sow in drills 14 to 16 inches apart and cover $\frac{1}{2}$ inch deep. When the young plants appear thin to 4 or 5 inches apart. For early use, sow as soon as ground can be worked in the spring; for autumn use, about the middle of May, and for winter use, about the 20th of June, according to variety, the long varieties requiring more time to mature than the round early kinds. When sown late, increase the quantity of seed. To preserve during winter, cover with earth to keep from wilting. When cooking, boil new Beets one hour, and old ones two hours or more. One package plants 15 feet of drill.

DETROIT DARK RED BEET

275 50 days. (Gregory Strain.) The best for Canning. (See illustration). Nearly as early as Crosby's Egyptian with flesh as dark as the Edmands, with a more intense red. Tops small, of the finest quality for either home or market. Oz. 10c., $\frac{1}{4}$ lb. 25c., 1 lb. 75c., 5 lbs. \$4.50.

GREGORY'S IMPROVED STRAIN OF CROSBY'S EGYPTIAN

300 45 days. One of the earliest and most popular. Especially recommended for greenhouse and farms. We doubt if it is possible to secure a finer strain even though you pay an increased price. Greenhouse men are planting our seed in their greenhouses for early spring. Oz. 10c., $\frac{1}{4}$ lb. 25c., 1 lb. 75c.

BEETS (Continued)**EDMANDS BLOOD**

280 60 days. (Gregory Strain.) This is the best strain of late Turnip Beet, with flesh of an extra dark color, which makes it the most popular Beet with market gardeners. It is superior to all others for winter market. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 75c., 5 lbs. \$3.00, postpaid.

BEET FOR GREENS

326 $\frac{1}{4}$ lb. 20c., lb. 65c., 5 lbs. \$2.75, postpaid; freight, prepaid, 100 lbs. \$40.00.

**SWISS CHARD
OR SPINACH BEET**

A species of Beet cultivated for its tops, which furnish excellent greens. Cultivate exactly like Beets, but thin out plants to stand 12 inches apart in the row.

LARGE RIBBED WHITE

345 Forms handsome plants 2 feet tall. Oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 80c.

LUCULLUS

350 This elegant new sort will be found on page 2 in our unrivaled 70c Vegetable Collection. Full descriptions are offered on page 2. Every home garden should contain a row of Lucullus Swiss Chard. Oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 90c., postpaid.

5-lb. lots deduct 15 cts. per lb. Quotations on larger quantities. Please write.

MANGEL-WURZELS AND SUGAR BEETS

As food for stock during winter months these are unequaled. They keep the stock in perfect physical condition and encourage the flow of milk in cows. They should be sown in drills about 2 feet apart and thinned to 12 or 15 inches in a row. (See our work in Mangel-Wurzels, etc.). One ounce to 50 feet of drill. Ten pounds per acre. Globe Mangels succeed better than the long sorts on sandy soil. Do not begin to feed them until midwinter.

**NORBITON GIANT, OR MAMMOTH
LONG RED**

360 100 days. Standard red; very extensively grown. Oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c., 5 lbs. \$2.40, postpaid.

MANGEL GIANT HALF-SUGAR

375 100 days. Steadily gaining favor among farmers for feeding cattle. Contain more nutritious matter than watery Mangels, have red skin, with white, fine-grained flesh and a good keeper. Oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c., 5 lbs., \$2.25, 10 lbs. \$4.00, postpaid.

GOLDEN TANKARD

390 Flesh deep yellow, with colored rings; good cropper. Oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c., 5 lbs. \$2.00, postpaid.

SLUDSTRUP MANGEL

392 100 days. Holds the world's record for dry matter content. This Mangel has been awarded a first-class certificate several times by the Danish Government, the highest honor in Denmark. Sludstrup is a long, reddish yellow, ovoid root, growing half out of the ground, easily harvested and by test excels any other variety in both the weight and feeding value of yield. Oz. 10c., $\frac{1}{4}$ lb. 20c., lb. 50c., 5 lbs. \$2.25, postpaid.

BROCCOLI**CALABRESE IMPROVED GREEN**

Introduced into this country by Italian gardeners. Broccoli has become very popular on account of its tender shoots of delicious flavor, for its healthful obesity reducing qualities.

When the green sprouts are a mass of flower buds two to three inches across and before the flowers appear they are ready to use. Sprouts if kept cut will be replaced by others for 8 to 10 weeks. Price: Pkt. 10c., 1 oz. 30c., 4 oz. 75c., postpaid.

J. E. THURBER, BARRE, VT., writes:—For the past three years I conducted a small market garden and feel that my success is due largely to the use of your seed. My vegetables are of a finer quality than those produced by my neighbors who used a different brand of seed.

BRUSSELS SPROUTS

CULTURE. A class of Sprouts allied to the Cabbage family, producing great numbers of small heads or Sprouts on the main stem of the plant, which are used in the manner of Cabbages. Plant in rich soil, in hills 2 feet apart each way, and thin to one plant to the hill.

LONG ISLAND IMPROVED

405 The most popular strain in New York market. Pkt. 10c., $\frac{1}{2}$ oz., 20c., oz. 35c., $\frac{1}{4}$ lb. \$1.35, postpaid.

DWARF PARIS MARKET

410 The standard variety in most parts of the country. Forms uniformly firm sprouts which are of very delicate flavor. A dwarf strain. Pkt. 10c., $\frac{1}{2}$ oz. 20c., oz. 35c., postpaid.

GREGORY'S THOROUGHbred CABBAGES

CULTURE. New land is preferable. Plough deep and manure liberally. The early sorts bear planting from 18 inches to 2 feet apart in the rows, with the rows from 2 to 2 $\frac{1}{2}$ feet apart; the large varieties to be from 2 to 3 feet apart in the rows, with the rows from 2 $\frac{1}{2}$ to 3 feet apart. The crops should receive as many as three hoeings and three cultivatings. Cabbage will not usually follow Cabbage or Turnips successfully in field culture unless three or four years have intervened between the crops. For late fall marketing, plant Drumhead sorts from June 10 to 20. One ounce to about 2000 plants. All our seeds are grown from the very best selected heads.

(Our work on "Cabbages and Cauliflower" gives valuable information. Price 45c.)

GLORY OF ENKHUIZEN

425 95 days. Grows large, solid, round heads with few outer leaves, and of such compact growth as to permit quite close planting. When trimmed heads weigh from 6 to 8 pounds. Our seed was produced by the originator in Holland. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., 1 lb. \$4.00 postpaid.

COPENHAGEN MARKET

Copenhagen
Market Cabbage

462 90 days. (SEE ILLUSTRATION). A very early hard heading variety, replacing such well known varieties as Early Jersey, Wakefield, Early Summer and Succession. Plants are vigorous, compact, with short stem and few outer leaves. Heads mature in 99 days. Pkt. 10c., $\frac{1}{2}$ oz., 20c., oz. 30c., $\frac{1}{4}$ lb. 75c., 1 lb. 2.50 postpaid.

CABBAGES—Continued

Other Fine Early Cabbage

EARLY JERSEY WAKE-FIELD

440 90 days. Standard extra early Cabbage in many markets of the country, but especially in the East. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

CHARLESTON WAKE-FIELD

445 95 days. This strain grows larger than the Early Jersey, but matures about ten days to two weeks later. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

ALL HEAD

455 105 days. Early, good sized, hard heading, heads finely. One of the finest Drumheads. Planted extensively in Florida. Very uniform in size. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.00, postpaid.

Second Early Sorts

ALL SEASONS

465 110 days. Sometimes called Vandergaw. This fine variety, which we were the first to catalogue, has, through clear, sheer merit, introduced itself, and is exceedingly popular in every quarter in the United States. Hundreds of pounds of this splendid sort is used by the large canners who use All Seasons exclusively in their manufacture of "Kraut." It is called All Seasons because it is just as good for late market or to keep over winter as it is for the early market. Our stock is from specially selected heads. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.00, postpaid.

GOLDEN ACRE CABBAGE

A valuable new variety from Denmark considered the most important recent Cabbage introduction. Eighty days from date of sowing. Heads measure 9 inches in diameter, entire plant occupies a space of 20 inches. Foliage consists of 13 leaves, height of stalk $1\frac{1}{4}$ inches. Ten days earlier than Copenhagen Market Cabbage. If you cater to the early market by all means try the Golden Acre. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

Burnham Aug. 1, 1932.

The Telephone Peas did fine and are lovely ones. I am planning to have seeds from you another season.

Mrs. Eva C. Hunt.

Golden Acre Cabbage

All Seasons Cabbage

WARREN

470 115 days. Is sometimes called Warren Stone-Mason. A very popular variety for market gardeners in the vicinity of Boston. One of the best varieties for storing for winter use, making a round, medium-sized and extremely hard head. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 40c., $\frac{1}{4}$ lb. \$1.50, lb. \$5.50, postpaid.

EARLY WINNIGSTADT

480 Heads large, cone shaped, solid; one of the best for all soils. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

FOTTLE'S EARLY BRUNSWICK

485 130 days. Earliest of the large heading Drum-heads. Pkt. 10c., $\frac{1}{2}$ oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

WONG BOK

538 A Great Vegetable from China. The famous Chinese Celery Cabbage. The plant as trimmed for eating is about 5 inches in diameter by 12 inches long. It has wide mid-ribs at the base and merges into crisp, tender leaves at the top, the whole being very compact and heavy. It blanches to almost clear white. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

CHINESE CABBAGE

"PEKING" PE-TSAI

As a cabbage in a class by itself. Habit of growth resembles a cos-lettuce when outer leaves are removed we have a lettuce and cabbage combined. Served raw or with dressing its superior to a cabbage slaw—tender and appetizing—a wonderful greed feed for poultry. In China they grow 3 tons in a space 40 x 60 feet. If given room grows 20 inches tall, 10 to 12 inches in diameter and to weigh 15 lbs. Price per pkt. 10c., 1 oz. 25c., $\frac{1}{4}$ lb. 75c., 1 lb. \$2.50, postpaid.

STIM-O-PLANT

PLANT STIMULANT TABLET

Trade Mark Registered U. S. Patent Office.

FEED YOUR PLANTS

Packet 10c.; 30 tablets 25c.; 100 tablets 75c.; 500 tablets \$2.50, postpaid.

CABBAGE—Continued**THE HOLLANDER**

495 120 days. One of the best of those hard-heading foreign varieties. The heads are thick, round, or medium size and about as hard as a rock. Exceedingly hardy, resists cold and stands dry weather well. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 85c., lb. \$2.75, postpaid.

DANISH WINTER BALL-HEAD

505 120 days. The most popular winter Cabbage. Heads medium size, round, solid, fine for storing for late winter use. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. \$1.00, lb. \$2.75, postpaid.

PREMIUM FLAT DUTCH

510 130 days. Excellent for winter; Extensively grown everywhere; a standard. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

IMPROVED AMERICAN SAVOY

515 110 days. (See illustration). The Improved American Savoy is one of our old standbys. It grows to good size. If you want a very dark green, curly variety, plant our strain, it is the best. The variety that the Boston market gardeners prefer. Pkt. 10c., $\frac{1}{2}$ oz. 20c., oz. 35c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

Improved American Savoy Cabbage

MAMMOTH ROCK RED

525 120 days. Largest of all the red varieties. The head is large, round, very solid and of deep red color. Ninety-eight per cent of the plants will form extra fine heads. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.75, postpaid.

RED DANISH STONEHEAD

535 120 days. A fine type of Cabbage introduced from Denmark, a country so famous for Cabbage and Cauliflower of quality. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.75, postpaid.

HUTCHINSON

542 Unquestionably the finest strain of Carrot yet introduced. This is a selection from the well-known Danvers, made by the late Mr. Amos Hutchinson, of Peabody, Mass. This Carrot always commanded the highest price in the market. In color it is a little darker than the Danvers, grows from 1 to 2 inches longer, and holds its fulness well down, and is a much heavier cropper. Two Carrots go across the box. You will actually secure 20 per cent more Carrots per acre from this variety than from the Danvers, and the quality is equally good. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 40c., $\frac{1}{4}$ lb. 90c., lb. \$2.75.

CHANTENAY

545 65 days. (See Illustration). Grown for the most critical market garden trade. Of rich, dark orange color. In earliness it ranks intermediate between the Danvers and the Short Horn. Of the style of the Danvers, hardly as large, but finer and more symmetrical. It is being used quite extensively by market gardeners for bunching. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 40c., lb. \$1.25, postpaid.

GUERANDE, OR OX-HEART

550 75 days. (See Illustration). Flesh bright orange, fine grained and sweet mature roots; $4\frac{1}{2}$ to 5 inches long; very thick; with a small tap root. Excellent to plant where soil is too stiff for longer varieties. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.05, postpaid.

CARROTS

Culture. Carrots thrive best in a sandy loam free from stones. The ground should be well manured with fine, well-rotted or composted manure, eight cords to the acre, and be thoroughly worked quite deep, by two ploughings made at right angles with each other. Also cultivate and drag, if there are any lumps, and then rake level, burying all remaining lumps and stones. Plant in rows 14 inches apart, and thin plants 3 to 4 inches in the rows. Plant from the middle of April to June 10, to insure crop. One ounce will sow 150 feet of drill. 3 lbs. seed per acre. (See our work on "Mangels and Carrots." Price 45c., postpaid.

GREGORY'S PRIZE DANVERS

540 80 days. Under high cultivation (see our treatise on Carrots and Mangels), 40 ton are raised to the acre, and at times even larger crops. This carrot is of a rich, dark orange in color, very smooth and handsome, and from its length is easier to dig than the Long Orange. We have the reputation, among the leading market gardeners and seedmen of the world, of having the finest strain of this variety. Oscar Beldon & Sons raised 2800 bushels on $2\frac{1}{2}$ acres. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

SCARLET NANTESE

555 This is about the neatest, nicest family carrot we have ever raised in our experimental grounds. It is just about invariably stump rooted; 3 to 4 inches long, a quick grower; used for growing under glass. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 45c., lb. \$1.25, postpaid.

Hutchinson Carrot

CARROT — Continued**Chantenay Carrot****EARLY SCARLET HORN**

565 70 days. Early, short variety for forcing, excellent for table; color deep orange. Pkt. 10c., oz. 15c., $\frac{1}{4}$ oz. 35c., lb. \$1.05, postpaid.

IMPROVED LONG ORANGE

575 80 days. If you are looking for a Carrot for late keeping try the Improved Long Orange. Some of our customers keep them into June and receive fancy prices. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.05, postpaid.

Carrots For Stock Feeding**LARGE WHITE BELGIAN**

585 Productive; good for horses; can be pulled by hand. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.05, postpaid.

YELLOW BELGIAN

590 Grows partly out of ground; capital for large stock-keepers. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 40c., lb. \$1.25, postpaid;

FRANCES E. CLARK, M.D., BOSTON, MASS., writes:

Last spring I bought of you 12 bushels of Gold Coin Potatoes. I have just returned from the farm in Union, Maine. My farmer, an experienced man, says they are the finest he ever saw, smooth and of good size.

**Guerande Carrot****CAULIFLOWER**

CULTURE. Pursue the same course as with Cabbage, manuring rather heavier and hoeing oftener. **Plant the late varieties early as they require the whole season to mature in.** Cauliflowers covet the cool, moist weather of the fall months to perfect themselves. One ounce for 2000 plants. (See treatise on Cabbage or Cauliflower. Price 45c., postpaid.)

GREGORY'S EXTRA EARLIEST

592 90 days. This very early variety came to us from Denmark. The earliest largest variety we had the pleasure of growing. In our experimental grounds it was the first to produce heads; in fact, no other variety showed any sign of a head when our Extra Earliest was ready for market. $\frac{1}{2}$ size pkt. 15c., pkt. 25c., $\frac{1}{4}$ oz. 75c., oz. \$2.50, $\frac{1}{4}$ lb. \$7.50, lb. \$20.00, postpaid.

GREGORY'S EARLY SNOWBALL

595 95 days. Our Snowball Cauliflower is grown especially for us in Denmark from carefully selected heads. It is a very reliable heading variety with a rich, snow white, close, compact curd of exceptionally fine quality. $\frac{1}{2}$ size pkt. 15c., pkt. 25c., $\frac{1}{4}$ oz. 75c., $\frac{1}{2}$ oz. \$1.35, oz. \$2.50, $\frac{1}{4}$ lb. \$7.50, lb. \$20.00, postpaid.

DWARF DANISH GIANT, DRY WEATHER

600 120 days. This superior strain originated in Copenhagen, Denmark. It is about two weeks later than our Snowball, makes a larger head, and is very resisting against unfavorable season and dry weather. We would suggest that our customers try this variety where they have had a failure with other strains. Every one does not meet with success in growing Cauliflower, but the land must be thoroughly enriched and the soil kept well cultivated during the entire season. $\frac{1}{2}$ pkt. 15c., pkt. 25c., $\frac{1}{4}$ oz. 75c., $\frac{1}{2}$ oz. \$1.35, oz. \$2.50, $\frac{1}{4}$ lb. \$7.50, lb. \$22.00.

GOLDEN PLUME OR WONDERFUL SELF-BLANCHING CELERY

625 It matures from two to three weeks earlier than Golden Self-Blanching and blanches in half the time. Of finest flavor, without strings. Sweet, succulent, crisp and tender. Solid, rapid growing heart. All good eating, even the foliage and good size for the table. Blight and Rust Resistant. Pkt. 15c., $\frac{1}{2}$ oz. 35c., oz. 55c., $\frac{1}{4}$ lb. \$1.75, $\frac{1}{2}$ lb. \$3.50.

**Gregory's Extra Earliest Cauliflower****CELERY**

CULTURE. Plant seed in hotbed or very early in open ground. Transplant 4 inches apart, when 3 inches high, in rich soil finely pulverized; water and protect until well rooted, then transplant into rows 5 or 6 feet apart, either on surface or in well manured trenches a foot in depth, half filled with well rotted manure. Set the plants from 8 to 12 inches apart. To blanch, draw earth around the plants from time to time, taking care not to cover the tops of the center shoots. For winter use in the family Celery needs to be hilled up only 8 inches. One ounce of seed gives about 4000 plants.

NEW EASY BLANCHING

630 120 days. A variety of celery of great merit on account of its rust resisting qualities. It is very easily blanched. Of dwarf compact growth useful both for early and for keeping throughout the winter months. Stalks are meaty, pure white, heavy and crisp, quality extra fine. Excellent to plant to follow Golden Self Blanching. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 45c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.50, postpaid.

CELERY (Continued)

GIANT PASCAL

650 145 days. One of the best late Celeries ever introduced, of surpassing flavor and great keeping qualities. It is a tall sort, growing large, thick and solid stalks. Dark green in color. It has a golden heart, and a rich, nutty flavor. This is a fine keeper. Pkt. 10c., ½ oz. 20c., oz. 35c., ¼ lb. 85c., lb. \$2.25, postpaid.

WINTER QUEEN

660 150 days. Most valuable variety of Celery for winter and spring use. It is also much stouter, thicker and heavier, with double the amount of heart of any known Celery. The plant blanches to a beautiful cream white, with ribs perfectly solid, crisp and of a delicious nutty flavor. Pkt. 10c., ½ oz. 20c., oz. 30c., ¼ lb. 85c., lb. \$2.25, postpaid.

OLD CELERY

685 For flavoring pickles, etc. Pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 45c., postpaid.

GREGORY'S CHOICEST STRAINS OF
SWEET CORN

CULTURE.—Do not plant before the ground has become warm; nothing is gained by it. Drill cultivation is more profitable than hill cultivation. The smaller varieties may be planted with the drills 2 ½ feet apart, and the stalks thinned to 10 inches apart. The larger sorts should have the drills 3 to 4 feet apart and the stalks a foot apart in the rows, and the largest Dent varieties 18 inches apart. Use some rich manure in the drills. Frequently stir the earth around the roots by hoe or cultivator, but do not draw it up about the stalks. A package of corn contains about 250 kernels—this is seed enough to plant over 25 hills—at a cost less than one cent per hill. One pound for 200 hills. Plant Corn by July 10, and if the season is an average one you will have green Corn early in November.

GOLDEN BANTAM

705 70 days. (SEE ILLUSTRATION). Our golden yellow sweet Corn is very early, very sweet, very hardy and of a delicious flavor, one that will become a favorite in every community wherever it is grown. It keeps longer than the white varieties in eating order.

BANTAM EVERGREEN

706 90 days. Golden Bantam Crossed with Stowell's Evergreen. This variety of Golden Sweet does not produce the small nubbins such as are found in the Golden Bantam. Ears are from 7 to 9 inches long with 12 to 14 rows.

In the crossing of the Golden Bantam and Stowell's Evergreen none of the good qualities of either have been lost. The flavor is rich, nut-like and delicious.

CHICORY WITLOOF, OR FRENCH
ENDIVE

695 4 months to mature roots. Culture.—Sow this just as you would carrots. For salad blanch the leaves by covering to exclude light. When left for the roots, thin out seedlings to stand about 4 in. apart in the row. In the fall, dig the roots and store them in the cellar or in frost-proof pit in the garden until wanted. Witloof Chicory is grown for its delicate, tender shoots, which it produces when these roots are planted in frames or boxes in the house during the winter months. Or the roots may be planted out in the spring in rows 28 inches apart and will produce delicate, creamy leaves in the garden. Elegant as a salad; superior to Cos Lettuce in flavor. Pkt. 10c., oz. 15c., ¼ lb. 40c., 1 lb. \$1.50.

CELERIC LARGE SMOOTH PRAGUE

670 140 days. Grown for its fleshy roots which are extensively used in soup. Boiled like Turnips and permitted to get cold, they form the basis of a most delicious salad. Peel off skin and cut roots in slices, after boiling. Add salt, pepper and a pinch of garlic, together with a dressing of vinegar and olive oil. This cold salad is considered a great delicacy. Pkt. 10c., ½ oz. 20c., oz. 35c.

CARPENTER'S GIANT GOLDEN
SWEET

710 80 days. The most delicious of all the golden sweet varieties of Corn that we have ever grown. The Carpenter's Golden Sweet surpasses all other varieties of yellow sweet Corn in quality, and does not have that mealy taste so characteristic of yellow varieties, retains its eating qualities much longer, as we found it very sweet even after we had thought it past the eating stage. Stalks grow 6 feet tall, with two to three ears on each stalk; excellent to plant for a succession with Golden Bantam and Golden Honey.

GOLDEN HONEY SWEET

785 A few days later than Golden Bantam, producing ears twice as large. Flavor delicious, many claim the quality equals the Golden Bantam. A more profitable variety to grow, yielding many more bushels per acre. Some call it Improved Golden Bantam.

DR. DE LUE'S GOLDEN GIANT

789 70 days. Dr. De Lue of Boston, introduced this variety several years ago, it being a cross between Howling Mob and Golden Bantam. It produces ears with 12 to 16 rows of a deep golden yellow, some ears measuring 9 inches long. Many stalks produce two well developed ears. Nearly as early as Golden Bantam (some claim it to be earlier) on account of the size of the ears a more profitable variety for the market gardener to grow; of exceedingly fine quality.

PRICES OF CORN ON THIS PAGE

Pkt. 10c; ½ lb. 25c; 1 lb. 40c; 2 lb. 75c; 5 lb. \$1.35; 10 lb. \$2.60 postpaid; 50 lb. \$9.75 not paid.

Golden Bantam

Whipples Giant Golden Sweet Corn

POCAHONTAS EARLY SWEET

719 65 days. Extremely early, with large, ten-rowed ears, quality superior to any extra early variety that we know. On our farms we find it several days later than our strain of Cory, but with an ear twice as large. Two hundred to three hundred boxes have been raised per acre. Gates Bros., Danvers, Mass., says they raised 1000 boxes on 2 $\frac{1}{4}$ acres.

**EXTRA EARLY
GOLDEN MARKET CORN**

730 An extremely early variety, Golden Market originated in Oregon. Our grower, who is a man of wide experience, informs us that the Golden Market is earlier than Golden Sunrise and that it is going to take the place of that excellent variety, quality of the best. Ears compact, ten to twelve rows, kernels closely set. Gardeners harvest means considerable in the way of dollars.

731 GOLDEN SUNSHINE CORN

An extra early variety of sweet corn, earlier than Golden Bantam. Stalks grow 4 $\frac{1}{4}$ to 5 feet, ears compact six to seven inches long with 10 to 12 rows of kernels instead of 8 as Golden Bantam kernels are closely set which gives a refined appearance to the ear. Quality delicious.

MEXICAN SWEET

745 Black and White Kernels, in sweetness and tenderness excels all varieties we know.

GREGORY PAYS THE FREIGHT

See Page 2.

STOWELL'S EVERGREEN SWEET

760 90 days. Green till cold weather; ears large; a standard late.

SWEET FODDER

770 For cow feed. Not, as usual, mere trash, but good Corn to vegetate.

MAMMOTH WHITE CORY

775 Some claim this to be as early as the original Cory with the great advantage of being decidedly larger in both ear and kernel.

QUINCY MARKET

780 70 days. There is no white variety of second early that gives equal satisfaction. Earlier than Crosby; 12 rowed.

Prices of above Varieties

Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c.
5 lb. \$1.35, 10 lb. \$2.50, postpaid;
50 lb. \$9.75, freight not paid.

**Whipple's Giant
Golden Sweet Corn**

This new corn is the result of crossing the Golden Bantam with the Whipple's Early White. Mr. Whipple has been working on this variety for about ten years, saving only the earliest well filled ears with the greatest number of rows, and discarding any kernels showing the least bit white. Planting from these selections, year after year the Originator has finally produced the Whipple's Giant Golden a new variety bearing two ears to a stalk with from 16 to 24 rows of kernels to the ear. This new variety has the flavor of the true Golden Bantam, and is earlier than many strains of corn bearing the name of Golden Bantam but which are not true to type, the ears are of such size that 38 fill a bushel box.

Price Pkt. 10c., $\frac{1}{2}$ lb. 25c., lb. 40c., 2 lbs. 70c., 6 lbs. \$1.65, 12 lbs. \$2.50, 100 lbs. \$16.00, postpaid.

POP CORN

821 Egyptian Pop, or White Rice. More tender when popped than the common variety. Pkt. 10c., $\frac{1}{2}$ lb. 25c., 1 lb. 40c., 2 lbs. 75c., postpaid;

CRESS

CULTURE. Plant on rich soil, finely pulverized, in drills 6 or 8 inches apart. That grown in the cool of the season is of the best quality. To be used as salad before the flowers appear.

UPLAND

823 Has all the characteristics of watercress, and can be grown easily in any garden. Pkt. 10c., $\frac{1}{4}$ oz. 25c., 1 oz. 40c.

CURLED, OR PEPPER GRASS

825 Furnishes a pleasantly pungent salad early in the season. Pkt. 10c., 1 oz. 20c., $\frac{1}{4}$ lb. 40c.

IMPROVED LARGE-LEAVED WATER

828 Larger leaves, better quality; productive. Pkt. 15c., $\frac{1}{2}$ oz. 65c., postpaid.

DANDELION

CULTURE. This vegetable has become very popular as an early, healthful green, and the roots also are used, when dried, as a substitute for coffee. Its use in either of these forms is particularly recommended to those who are inclined to any disease of the liver. Sow in May, in drills 1 foot apart, covering the seed $\frac{1}{4}$ inch deep. Rich soil is preferable, but this plant will thrive anywhere.

**IMPROVED FRENCH THICK-
LEAVED OR ARLINGTON**

871 Saved from open blossoms. Seven hundred bushels have been grown on three-fourths of an acre. Pkt. 15c. $\frac{1}{2}$ oz. 40c., 1 oz. 75c., $\frac{1}{4}$ lb. \$2.50.

GREGORY'S CHOICE CUCUMBERS

NITROPHOSKA IS A GOOD FERTILIZER FOR CUCUMBERS

Plant after the ground has become warm, in hills 3 feet apart for the smaller varieties, and 4 feet for the larger. Manure with sheep manure or some well-rotted compost, working the manure just under the surface. Sprinkle vines with Arsenic of Lead and Bordeaux Mixture to protect from bugs and disease. One ounce for 50 hills.

EXTRA SELECTED WHITE SPINE

837 60 days. (SEE ILLUSTRATION). We offer our customers a fine strain of the White Spine, which they will find superior, in its fine size and symmetrical shape, to many strains, while in purity it is remarkable.

IMPROVED WHITE SPINE, OR ARLINGTON

839 60 days. Great bearer, standard for outdoors.

FORDHOOK FAMOUS

845 The introducer claims: "Vines produce an enormous crop, of unusually vigorous growth. Smooth and very dark green, the handsome fruits measure 12 to 18 inches long; they are always straight, never turn yellow and are extra solid. The seed space is extremely small."

DAVIS' PERFECT

847 60 days. In our experimental grounds it was a heavy cropper, dark green color, an excellent variety for general outdoor use. For uniformity of fruits and as a prolific bearer. Davis' Perfect has no superior among White Spine sorts for outdoor planting.

EARLY FORTUNE CUCUMBER

846 Fruits of a rich dark green color, averaging about nine inches long. Has a small seed cavity, thick fleshed, tender and crisp.

IMPROVED LONG GREEN

850 70 days. The old standard long variety. Also called London Long Green.

SNOW'S PICKLING CUCUMBER

851 An early maturing, small dark green cucumber, cylindrical square ended, popular with growers for small pickles. It is a strong, vigorous grower. Its dark green color makes it exceptionally valuable and attractive.

BOSTON PICKLING

858 60 days. A medium long variety; the standard for pickling in Boston market.

PRICES for all CUCUMBERS

Pkt. 10c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.40, postpaid.

EARLY CLUSTER

866 Bears mostly in clusters; early and productive.

EARLY RUSSIAN

868 One of the very earliest of all varieties; grows about 4 inches long.

JAPANESE CLIMBING

869 Rust resisting. Vines are very healthy and vigorous, with dark green foliage, and throw out strong tendrils, enabling them to climb trellis, wire netting or any other suitable support.

EGG PLANT

CULTURE. Plant the seed in March in a hotbed, or, for family use, in flower pots in a warm window. Transplant in open ground after weather has become warm and settled, in rows 2 feet apart each way. They require rich soil and as favorable a location for warmth as the garden will afford. One ounce to 1000 plants.

BLACK BEAUTY

877 125 days. Considered the earliest of the large-fruited varieties. Color a rich purple. Pkt. 10c., $\frac{1}{2}$ oz. 35c., 1 oz. 55c., $\frac{1}{4}$ lb. \$1.50.

ENDIVE

CULTURE. For early use sow as soon as the ground can be worked in the spring, in drills 15 inches apart, and thin plants to 6 to 8 inches in a row. Any common garden soil will do, but a rather moist situation is preferable. To blanch the leaves, gather them carefully together when perfectly dry, and tie with matting or any soft fibrous materials. Valuable as a food for those who suffer with indigestion. One ounce will sow 150 feet of drill.

FINE MOSS CURLED

883 100 days. Very ornamental. A little more curled than the London. Same price as Batavian.

FULL-HEARTED ENDIVE (Escarolle)

884 The Full-Hearted closely resembles the Broad-leaved Bavarian, with broad and thick leaves, twisted and waved, with round ends, and of a bright deep green, with nearly white mid-rib. The head, however, is more compact and is full, blanching easily to a creamy white. Oz. 25c; $\frac{1}{4}$ lb. 60c; 1 lb. \$1.65.

BROAD-LEAVED BATAVIAN

885 100 days. A large summer variety. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 40c., 1 lb. \$1.30, postpaid.

FENNEL

Sow early in spring, in rich, well prepared soil. The rows should be 2 feet apart and the seeds covered $\frac{1}{4}$ to $\frac{1}{2}$ inch deep. When the plants are about 2 inches tall, thin to 10 inches apart in the row. When half grown, if the plants are earthed up and treated like celery, the stems will be white, crisp, and palatable.

FLORENCE (Sweet Anise)

FLORENCE (Sweet Anise). The bulb at the base of this hardy annual may either be sliced raw, or cooked. The crisp stalks above are often eaten like celery. If covered with soil, the bulb will blanch to a fine creamy white. The plant is branching and has dense feathery foliage that gives off a sweet aroma. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c.

Extra Selected White Spine

KALE or BORECOLE

CULTURE. Plant the larger sorts in hills 2 by 3 feet apart, and thin to one plant to the hill. Select deep, rich soil and cultivate as Cabbage. Some of the varieties are very ornamental, and scattered singly are attractive in the flower garden, being finely curled and variegated with green, yellowish-white, bright red and purple leaves. The tender leaves are used as Cabbage. One ounce of seed will sow about 200 feet of row — four pounds of seed per acre.

DWARF GREEN CURLED

886 55 days. Very hardy; a standard market sort. Dwarf spreading variety a foot in height.

GREEN CURLED TALL SCOTCH

887 60 days. One of the best varieties for the market. 3-4 feet tall with long plume like leaves. Pkt. 10c., oz. 15c., 2 oz. 25c., $\frac{1}{4}$ lb. 40c., lb. \$1.00, postpaid.

LETTUCE

CULTURE. Lettuce covets a rich and rather moist soil. The rows should be about 14 inches apart, and the plants thinned from 8 to 10 inches apart for the heading varieties. When heads are not desired it may be grown in a mass. The more rapid the growth the better the quality. Some varieties are peculiarly adapted for early culture, others for summer growth. One ounce for 3000 plants.

GREGORY BLACK-SEEDED TENNIS BALL

896 71 days. (SEE ILLUSTRATION). Our strain of this variety is considered the standard for quality, excellence and purity. A decidedly butter variety, strictly Cabbage-heading, medium in size, slow to run to seed. Plant compact or slightly spreading, and forming a globular, firm, very defined, well-blanching head, with leaves very closely overlapping one another. A sure header, very reliable, hardy, excellent shipper and good seller. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

MAY KING

895 75 days. It is not in the least affected by cold or wet weather, grows very quickly, and produces even in poor soil splendid globular heads, which are ready 10 to 14 days before any other, and stand a long time before running to seed. In flavor unexcelled by any sort. Sown extensively in greenhouses during the winter for the Boston Market. Pkt. 10c., oz. 20c., 2 oz. 35c., $\frac{1}{4}$ lb. 65c., lb., \$2.00, postpaid.

UNRIVALED

900 78 days. White headed similar to Big Boston but with no tint of brown and the head is of a whitish green. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

GRAND RAPIDS

901 60 days. (Black Seed). Loose-leaf in some section forced under glass for winter, less liable to rot and remains in condition longer than some, after being cut. Leaves bright green, savoyed, finely crimped at the edges. Quality excellent. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

BLACK-SEEDED SIMPSON

905 Excellent for out-door sowing. Exceedingly tender, golden yellow, loose leaved, finely fringed. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

EARLY PRIZE HEAD

906 White seeded, Bronze leaf. An acquisition; runs to seed slowly; very tender and of fine flavor. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

BIG BOSTON

907 78 days. (White Seeded). The heads of this lettuce are firm and solid. A standard market garden and shipping variety. Excellent for forcing in cold frames, during the winter months. Produces heads of large size often measuring 10 to 12 inches across, succeeds in cold temperatures better than many forcing varieties. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

MAMMOTH BUTTER

908 (Black Seed). A cabbage, butter head, large size, medium green. Similar to Salamander but fully a third larger. Leaves smoother than Salamander. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

KOHLRABI

CULTURE. Prepare ground as for Cabbage, then plant about the first of June in rows 2 feet apart, thinning the plants to 12 inches in the rows. To preserve over winter treat as Turnips. When young their flesh is tender and resembles a fine Ruta-Baga, with less of the Turnip flavor. When fully matured, they are excellent for stock. One ounce of seed will sow about 250 feet of row.

EARLY WHITE VIENNA

890 A standard early kind.

LARGE PURPLE VIENNA

891 Very large, hardy and productive. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 80c., lb. \$3.00, postpaid.

Gregory's Black-Seeded Tennis Ball Lettuce

ALL SEASONS

912 77 days. The foremost mid-season butterhead Lettuce, surpassing in heat resisting qualities every other sort in its class. Forms good-sized, compact heads of dark green color. It "stands" a considerable time before going to seed after heads are fully matured. Very much resembles Old Deacon, but is black-seeded and the edges of leaves are fine toothed. No better butterhead Lettuce for summer use can be found. It stands longer than any and the quality is always superb. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

NEW YORK OR ICEBERG

914 87 days. One of the favorite varieties with the market gardeners about New York City, and especially in California. Originated from the Giant Crystal Head. This variety is distinguished by the rich golden yellowish color on the inside of the heart. The outside leaves are dark green; the heads somewhat conical in shape, rather solid and of enormous size, measuring 15 inches across. Pkt. 10c., $\frac{1}{2}$ oz. 20c., $\frac{1}{4}$ lb. 85c., lb. \$2.25, postpaid.

913 NEW YORK NO. 12

This strain has been bred for earliness, large size, solid, a trifle lighter color than other strains of New York. Popular with shippers, as it does well in mid-summer. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 65c., postpaid.

HANSON

918 86 days. Our Hanson is the improved strain. Its heads grow to a remarkable size, sweet, tender and crisp even to the outer leaves; the Hanson is free from any bitter taste found in some sorts. For outdoor cultivation it is hard to beat if grown on ground well manured and well cultivated. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

WHITE PARIS COS

921 82 days. The standard Cos variety. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

GREGORY'S FINE MUSKMELONS

CULTURE. Select warm and light soil, a poor, light soil is better than a cold and rich one. Thoroughly work the soil; manure with a rich fertilizer or a rich compost, having the hills 6 feet apart for the musk varieties and 8 for Watermelons. Do not excavate hills, but work the manure just under the surface, as the roots of all vines naturally seek warmth. Pinch the ends of the more vigorous vines from time to time and work in a fertilizer between the rows. Plant a dozen or more seeds in each hill, but do not leave over two plants. Sprinkle young plants liberally with plaster or Pyrox to protect from insects.

Green-Fleshed

ROCKY FORD, OR NETTED GEM

925 Fruits are nearly round, covered with netting. Green flesh, very sweet and highly flavored. Uniform in shape and size. An excellent shipping Melon. Very productive. Size $5\frac{1}{2} \times 5$ inches; edible in 96 days. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

BUSKIRK BLIGHT AND RUST PROOF CANTELOUPE

926 95 days. A Japanese rust-proof variety crossed with the famous Rocky Ford strain green-flesh. This crossing has given them splendid quality, besides making them better shippers. One customer writes: "I have been growing Cantaloupes on a large scale for 10 years, but find yours the most prolific yielder, the sweetest, the thickest-fleshed, and after they have been in the market 3 days they are in better condition than others that are but 12 hours from the vines." Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

Salmon-Fleshed LAKE CHAMPLAIN

931 87 days. Very early takes from 70 to 90 days to mature. A vigorous and healthy vine, producing fruit in great abundance. Melons medium size of Hackensack type. Very sweet of a golden yellow color. Size $6 \times 5\frac{1}{2}$ inches; weight 3 lbs. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

HONEY DEW MELON

932 Averages 9 inches long by 7 inches wide. Color light greenish white until dead ripe when it turns to a pale yellow. In order to develop it in this part of the country, start in pots under glass. On account of the delicious flavor it commands a ready sale. Pkt. 10c., oz. 20c., 2 oz. 35c., $\frac{1}{4}$ lb. 60c., postpaid.

HEARTS OF GOLD

935 88 days. One of the best varieties for shipping. Distinctly ribbed and covered with a fine netting. Flesh a rich salmon shade thick meated, ripens close to the rind and is of excellent quality. Fruit uniform. Size 6×5 inches; weight about 2 pounds. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

THE MILLER CREAM OR OSAGE

942 95 days. This Melon, which we were the first to name and catalogue, has deservedly become exceedingly popular, probably more so than any other Muskmelon; a cross between those two delicious Melons, Sill's Hybrid and Casaba, growing rather larger and maturing a little later than the former. The flesh is of a rich salmon color, very sweet and so very thick that the Melon is almost solid, with a small seed cavity. Very productive. Size $8 \times 6\frac{1}{2}$ inches; weight 6 lbs. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

NASTURTIUMS

Culture. Plant in May in rows 3 feet apart, the climbing varieties to cover some arbor or fence, or climb or twine around the house, the dwarf kind in hills or in rows 2 feet apart. The leaves are used for salad.

TALL

980 An ornamental climber. Several fine varieties mixed. Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. 90c., postpaid.

DWARF

981 Several fine varieties are included in this mixture Pkt. 5c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. 90c., postpaid.

BURRELL'S GEM

937 95 days. Resembles Rocky Ford very much in shape, but the flesh is of a rich, dark salmon or orange color, is very thick, fine-grained and deliciously rich and spicy in flavor; rind thin but tough. Has a remarkably small seed cavity. Skin rather dark green, finely netted and slightly ribbed. Size $6\frac{1}{2} \times 5$ inches; averaging in weight about 2 pounds. An excellent shipper. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.25, postpaid.

EMERALD GEM

938 87 days. Of the Christiana type, small in size, very early and in form flat-round. The flesh is of a deep orange color and very thick, the seed cavity being exceptionally small. They are very sweet and the flavor delicious the Melon being always good. Size 4×5 inches; weight $1\frac{3}{4}$ to 2 lbs. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 35c., lb. \$1.25, postpaid.

BENDER'S SURPRISE

940 94 days. A favorite in the vicinity of Albany, N.Y., of delicious flavor. Oval shape, large, coarse netted, skin light greenish yellow. Flesh deep orange and very thick. Will keep for a week, after picking and flavor improves. Size 8×6 inches; weight 7 lbs. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

Miller Cream

BANANA

943 94 days. Externally it is of a creamy white or delicate straw color. The flesh (the Melon being nearly solid) is of a rich salmon. The quality is first rate when the Melons are thoroughly ripe. It grows from 18 inches to 2 feet in length and is very prolific. When ripe it smells like a Banana. Weight about 7 lbs. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 75c., postpaid.

LONG YELLOW

945 94 days. Very long, large and with salmon flesh heavily netted and ribbed. One of the largest of the pink flesh sorts; exceptionally sweet and spicy. Early, but not suitable for shipping. Size 9×6 inches; weight 10 lbs. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 65c., lb. \$2.00, postpaid.

OKRA OR GUMBO

CULTURE. Select warm and rich soil, and plant when the ground becomes warm, in rows 2 feet apart, thinning plants a foot apart in the row. The pods are used to thicken soups, being gathered when young. In the North they require the warmest location, and it is better to start them in a hotbed. The seeds are a long time in germinating.

WHITE VELVET

982 Pods smooth, exceedingly tender and well flavored; very prolific. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c.

DWARF GREEN LONG POD

984 Especially recommended for home gardens. Pods remain in condition for cooking or canning until quite large. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 30c., postpaid.

PERKINS MAMMOTH

985 Very prolific, when ready for use. Is from 4 to 5 inches in length, of a handsome green color. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., postpaid.

WATERMELONS

CULTURE. In cultural requirements these differ little from Muskmelons, except that they should be planted in hills about 10 feet apart each way. After the vines begin to spread, cultivation should be pursued very cautiously, since Watermelon vines resent being moved about or stepped upon.

Kleckley Sweets, or Monte Cristo

948 87 days. We introduce this new Melon as a splendid sort for home use or near markets, as the flesh is tender and delicious. Vine vigorous and productive; fruit often reaching 22 inches in length and 50 pounds weight; color dark mottled green; flesh very bright, rich red and exceedingly sweet. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

TOM WATSON

950 92 days. No other Melon of recent introduction has attained popularity in such a comparatively short time as Tom Watson. The handsome, oblong, dark green fruits average 20 inches long and weigh from 30 to 50 pounds. While the crisp, dark red, deliciously sweet flesh extends to within $\frac{3}{4}$ inch of the rind, the Melon will stand long-distance shipment to perfection, and outsells every other Melon on the market. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

SWEETHEART WATERMELON

953 88 days. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, (15 x 10 inches) very heavy uniformly mottled light and dark green. Rind thin but firm. Flesh bright red, firm, solid, but very tender, melting and sweet. Fruit remains in condition for use longer than most sorts. Seeds gray. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

COLE'S EARLY

954 80 days. One of the finest Melons ever offered, remarkably early, and will mature in every State, very hardy, vigorous and a sure cropper. Sweet and delicate, flesh a deep red color. The rind is thin and the quality of the flesh is sustained clear to the rind. Melons medium size, nearly round, rind green striped, with lighter shades. Being somewhat brittle, it will not do for shipping purposes. Size 12 x 11 inches; weight 20 pounds. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

Tom Watson Watermelon

FERRY'S PEERLESS

955 90 days. In our experimental grounds the earliest variety was the Peerless; ripened all at once and was of delicious quality. Oval to long in shape, bright green; finely veined and mottled; rind thin; flesh bright scarlet, solid, crisp, tender and very sweet. No Melon we have eaten or that we gave to our friends afforded such universal satisfaction. We recommend it for family use, and not as a shipper. Size 12 x 10 inches. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

COLORADO PRESERVING CITRON

970 100 days. (Red Seeded). Perfectly round; for preserve only; hardy and very productive. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 45c., lb. \$1.05, postpaid.

HALBERT HONEY

972 87 days. A beautiful, dark, glossy green Melon of symmetrical shape and good size. A heavy bearer of fine fruits early in the season. Flesh of beautiful crimson color extends to within $\frac{1}{2}$ inch of the very thin outer rind and is literally "as sweet as sugar." Size 10 x 12 inches. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 25c., lb. 75c., postpaid.

MUSTARD

CULTURE. Sow in drills 1 foot apart and cover lightly. Thrives in almost any soil. Water frequently in dry weather, and for a succession sow every two weeks during the season. Used principally for salads.

CHINESE LARGE-LEAVED

975 A fine sort for greens. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 35c., lb. \$1.00 postpaid.

GREGORY'S SUPERIOR ONION SEED

CULTURE. In some parts of the country the term "Silver-Skin" denotes a white variety, in other parts a yellow variety. Please indicate in your order which you want. The soil should be free from large stones. Apply from ten to twelve cords of rich, fine compost to the acre. Plough not over 5 inches deep, and work well with the cultivator. Plough again at right angles with first furrows, and cultivate again. Now rake level and fine, and plant seed in rows 14 inches apart at rate of five pounds to the acre. Keep very clean of weeds. When ripe pull and dry very thoroughly before storing. For full particulars see our work on "Onion Raising." Plant Onion sets 2 inches apart in rows a foot apart. To grow sets, plant the seed at the rate of thirty to sixty pounds to the acre.

About Our Prices. When you are considering Onion seed don't compare ours with cheap seed. Our seed is all grown from selected bulbs of the best strains.

(If you are in need of 10 lbs., or more write us for special prices.)

Gregory's Improved Yellow Globe Onion

SOUTHPORT YELLOW GLOBE

986 100 days. In this we have a variety precisely like the Southport White and Red in shape, differing from them in color only. It may be defined as a late Globe Danvers, a larger cropper than the Early Round Yellow Danvers.

EARLY ROUND YELLOW DANVERS

987 105 days. By careful selection we increased the roundness of our Early Round Yellow Danvers, until now it is a fine, large, thick Onion. The Danvers Onion does best on a gravelly loam, making harder and brighter colored bulbs than on heavy, dark or mucky soil, while it keeps better. Our strain has small necks and is very uniform in size and shape; a fine keeper of exceptionally fine quality.

SOUTHPORT RED GLOBE

998 100 days. Very popular in the markets of New York. It measures better and sells at a higher price than Red Wethersfield; a heavy cropper of beautiful and symmetrical bulbs. Keeps better than the White and the Yellow Globe. The greatest market Onion of the Central West

GREGORY'S IMPROVED YELLOW GLOBE ONION

(SEE ILLUSTRATION)

Our Early Round Yellow Danvers are crossed with the Southport Yellow Globe. Improved Yellow Globe is the result of many years of careful work; matures midway between the two. As the outside skin is somewhat tougher than the Danvers, it is more profitable as a shipping variety. It is a heavy cropper, producing one-fourth more crop than the Danvers and is less liable to blight. This is a standard variety in sections of the country where Onions are raised for cold storage. There is no variety that equals it as a keeper. Oscar Belden & Sons, the largest onion growers in the State, averaged **700 bushels per acre**. Mr. Harry Bardwell's (Hatfield) crop yielded over **800 bushels per acre**. Albert E. Clark, Sunderland, states that he had over **3000 bushels on four acres** of Onions from our seed

Prizetaker Onion. American Grown Seed

LARGE RED WETHERSFIELD

996 110 days. This is the famous old standby, a thick flat red. It is hardy, later than Danvers.

EBENEZER (Used for Sets)

989 Somewhat flattened with yellow skin and white firm flesh. Matures in 90 days. An excellent winter keeper.

SOUTHPORT WHITE GLOBE

986 110 days. In this we have a variety precisely like the Southport White and Red in shape, differing from them in color only. It may be defined as a late Globe Danvers, a larger cropper than the Early Round Yellow Danvers.

WHITE PORTUGAL

992 95 days. A very early and mild flavored onion with a silvery white skin, flesh snow white. Should be harvested before being thoroughly ripe and cured in the shade, in order to hold its snow white color. Extensively planted for sets and pickles.

YELLOW PRIZETAKER

1001 120 days. (SEE ILLUSTRATION). This is the large, handsome, straw-yellow Onion sold at the fruit stands and delicatessen stores of the large cities at fancy prices. Well developed bulbs average 11 to 12 inches in circumference, are perfectly globular and very solid. Skin is thin, flesh, pure white, fine grained and of a mild, delicate flavor. Market Gardeners in this section start Prizetaker in hotbeds in February, transplanting to open ground as soon as soil may be worked in the spring.

WHITE PEARL, OR NEW QUEEN

1006 95 days. A new white Onion; excepting Barletta, the earliest of all, as fine as it is early. Pkt. 15c., oz. 25c., ½ lb. 85c., lb. \$3.00.

BARLETTA

1005 85 days. The earliest of all Onions; white; grows about 1½ inch in diameter. Pkt. 10c., oz. 30c., ½ lb. 85c., lb. \$3.00

ONION SETS

For Spring Planting

Prices Subject to Change

White Bottom Sets. 1 lb. 40c., 4 lbs. \$1.25. 8 lbs. \$2.25, postpaid.

Yellow Bottom Sets. 1 lb. 40c., 4 lbs. \$1.30. 8 lbs. \$2.35, postpaid.

PARSLEY

CULTURE. Select rich soil and sow the seed in drills 1 foot apart, covering ... of an inch deep. The seed is usually from 15 to 25 days vegetating. Thin plants to 4 inches apart when 2 inches high. It is used principally for flavoring soups, etc.,

ARLINGTON DOUBLE MOSS CURLED

1008 65 days. A market gardener's strain. One of the most successful of these says of it: "The plant is very robust and of free growth. The leaves are large, very dark green and beautifully curled. An exceedingly large yielder, stands heat, cold and drought better than any other." Oz. 10c, ½ lb. 25c., lb. 75c., postpaid.

PLAIN OR SINGLE

1011 70 days. Extensively grown by Italians and Greeks. Oz. 10c., ½ lb. 25c., lb. 75c.

J. E. THURBER, BARRE, VT., writes:—For the past three years I conducted a small market garden and feel that my success is due largely to the use of your seed. My vegetables are of a finer quality than those produced by my neighbors who used a different brand of seed.

H. E. GREEN, TOOPERANG, GINNISS, SOUTH AUSTRALIA writes:—I believe John Baer Tomato is one of the best tomatoes that ever came to South Australia.

PRICES of all varieties ONION SEED, except otherwise given

Pkt. 10c; ½ oz. 20c; oz. 30c; ¼ lb. 90c; lb. \$2.75, postpaid.

PARSNIP

Culture. Give the richest and deepest soil to the long varieties of Parsnip. Make the soil very fine, and plant the seed very early in rows of 18 inches apart, thinning plants to 3 to 5 inches in the rows. These seeds should be planted shallow. To keep well in the ground over winter draw a little earth over the tops. Five lbs. of seed per acre.

Abbott's Improved Hollow Crown Parsnips

ABBOT'S HOLLOW CROWNED

1013 130 days.

Market gardeners throughout the country have found by experience that there is no strain equal to Gregory's Prize Parsnip, as it takes prizes wherever exhibited. The roots are long, but not too long. It has a very clear, smooth skin, and is easily distinguished by the leaves rising from a depression on the top of the root. Parsnips do best on a deep rich, sandy soil, but will do well on any soil that has good depth. Pkt. 10c., oz. 20c., ¼ lb. 40c., lb. \$1.00, postpaid.

SHORT THICK PARSNIP

The tops are only about half the size of ordinary Hollow Crown. The roots are short and thick, reaching a diameter of 2½ to 3½ inches and a length of only 6 or 8 inches at the thickened part, making it easy to pull. This variety is very early, fully a month earlier than Hollow Crown, and often reaches full size in 100 days from planting time. Price per pkt. 10c., 1 oz. 15c., ¼ lb. 40c., 1 lb. \$1.00.

Comparison — Short Thick Shoulder at bottom. Hollow Crown at top.

PEAS

CULTURE. The following that are wrinkled varieties, the sweetest of all, but, being liable to rot, need to be planted thicker and later than the round sorts. While the tall sort will run too much to vine if liberally manured, the dwarf varieties, on the contrary, need liberal manuring. Have the dwarfs that grow not over 15 inches high in rows 2½ feet apart; those varieties attaining the height of from 2 to 3 feet in rows 3 feet apart and the rows of the tallest sort 4 feet apart. Two pounds to 150 feet — 1018 and 1019 are exceptions.

LAXTON'S PROGRESS PEA

1025 Our growers report after a very careful trial with all other dwarf growing large podded early varieties we pronounce this by far the best. It grows 1½ to 2 feet tall and most of the plants average 8 to 10 dark green pods each containing 9 or 10 very delicious peas. For the home garden or market it should eventually displace many well-known varieties. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 65c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$9.50.

Little Marvel Pea

LITTLE MARVEL

1026 Grows to the height of 18 inches, and is very uniform in its growth. In England it is used as a forcing Pea; pods very dark green in color, containing from 5 to 7 peas on the average, and of excellent flavor. A fine family pea. It was planted in our experimental grounds May 15, and was ready to pick July 9. (See Illustration). Pkt. 10c., ½ lb. 20c., lb. 35c., 2 lbs. 60c., postpaid; by freight, prepaid 7 lbs. \$1.60, 14 lbs. \$2.75, 56 lbs. \$9.50

PIONEER

1027 57 days. The plant is unusually robust in habit, carries a heavy crop of long, pointed pods of a dark green color. So numerous are the pods that the plants present a most striking appearance. One gardener stated that he planted April 1, and the first pods were harvested June 16, beating Gradus by a fortnight. A Giant dwarf, grows about 24 inches high. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 65c., postpaid; by freight prepaid, 7 lbs. \$1.60, 14 lbs. \$2.75, 56 lbs. \$9.50.

AMERICAN WONDER

1030 Time-honored early dwarf wrinkled Pea. Pkt. 10c. ½ lb. 20c. lb. 35c., 2 lbs. 60c., postpaid; by freight, prepaid, 7 lbs. \$1.50, 14 lbs. \$2.75, 60 lbs. \$10.00

Pioneer Pea

Peas — Continued

GREGORY'S SURPRISE

1038 47 days. (Our introduction). This pea we named and introduced, is the earliest of all the wrinkled sorts. It will be found to be even earlier than the Alaska and Maud S. The vines grow from 20 to 24 ins. in height and need no sticking. Though fully as early as the earliest hard sorts in delicious sweetness, good judges claim that it is unequalled. Every family garden should have this Pea. The best of all first early, wrinkled varieties. A favorite with canners on account of its delicious flavor. Pkt. 10c., ½ lb. 25c., lb. 35c., 2 lbs. 60c., postpaid; by freight, prepaid, 7 lbs. \$1.60, 14 lbs. \$2.75, 56 lbs. \$9.50.

GREGORY'S EARLY EXCELSIOR

1024 57 days. (SEE ILLUSTRATION). Without any exception, the finest low-growing early Pea. We expect a fine lot this season, but the demand is so large we would advise our customers to order early. Very hardy and can be planted early. It differs from Nott's Excelsior (one of our introductions) in that, first, it is better than its American cousin; second, the pods and peas are decidedly larger, and third, the vines, while of the same height, are stouter, while fourth, it is decidedly a better cropper. We especially recommend it as an excellent sort to plant between rows of strawberries. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$9.50.

Gregory's Early Excelsior

StimUplant
Makes a
Wonder Garden

THE GRADUS

1034 60 days. (SEE ILLUSTRATION). This is undoubtedly one of the earliest of all the large-podded, wrinkled Peas yet introduced. Planted April 25, will be ready for market July 4. The quality of the Pea, with its extreme earliness, make it a decided acquisition to the family garden. Pkt. 10c., ½ lb. 25c., lb. 35c., 2 lbs. 60c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$9.50.

MARCHIONESS PEA

1039 (SEE ILLUSTRATION). Marchioness is a very early green, wrinkled variety, height 3 ft., heavy cropper, pods large, straight, dark green and well filled. The originator says: "We consider it one of the finest and most valuable Pea we have ever put on the market. When tested alongside Gradus it proved to be several days earlier, with larger pods and a much heavier cropper." Our experimental grounds show us that this is a coming Pea. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 65c., postpaid; 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$9.50, by freight.

THOMAS LAXTON

1040 One of the finest eating and most productive of the large podded early sort pods; blunt shaped; dark colored; 3 ½ inches long. Fit for the table in 60 days. Pkt. 10c., ½ lb. 20c., lb. 35c., 2 lbs. 60c., postpaid; by freight, prepaid, 7 lbs. \$1.50, 14 lbs. \$2.75, 56 lbs. \$10.00.

TO INCREASE YOUR CROP

Inoculate your Peas with Humogerm.

See page 20

Early Morn Pea

EARLY MORN

1042 (See Illustration). It is earlier than either Thomas Laxton or Gradus. Planted May 5, a mess was picked July 4 (60 days). We found that not only is Early Morn earlier, but it has larger pods and is decidedly a better cropper than Gradus. Davis Evans Low of Essex states: "From one bushel of seed I raised 80 bushels, that sold from \$3.00 to \$3.50 per bushel." Every one should plant this Pea if he wants an extra large, dark-podded Pea for the 4th of July market. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 75c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$10.00.

ADMIRAL DEWEY PEA

1045 70 days. We agree with the originator in his claims for this excellent Pea, without exception the largest podded Pea grown; a tremendous cropper; very dark green pod, of excellent quality. The very best of the late varieties. Height 3 ½ feet; foliage, vine and pod a rich, dark green. Remarkably healthy and vigorous, producing abundance of pods of largest size, sometimes 6 inches in length, well filled with Peas of large size, tender, and of first-class flavor. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$3.00, 56 lbs. \$10.00

ALDERMAN

1047 70 days. (SEE ILLUSTRATION). The finest of all midseason varieties. It matures just after the extra early sorts, like Thomas Laxton and Gregory's Excelsior, and before Telephone and Champion of England begin to bear. Alderman grows 4 to 5 feet tall under favorable conditions. The handsome pods are borne in pairs averaging 4 inches long, and contain approximately 8 large, dark green peas of elegant flavor. Pkt. 10c., ½ lb. 25c., lb. 40c., 2 lbs. 70c., postpaid; by freight, prepaid, 7 lbs. \$1.75, 14 lbs. \$3.00, 56 lbs. \$10.00

Wyoming Wonder Pea

PEPPERS

CHINESE GIANT

1064 150 days. Size 4 by 4 inches, it's a monster. Plants about 2 feet in height; strong, vigorous and productive. Fruit similar in shape to Large Bell or Bull Nose, is deep scarlet in color. The flesh is very thick and sweet. Pkt. 10c., $\frac{1}{2}$ oz. 35c., 1 oz. 65c., $\frac{1}{4}$ lb. \$2.00.

ROYAL KING

1065 140 days. A heavy cropper of large square uniform peppers. Fruits are thick fleshed of dark glossy green, changing to brilliant red when ripe. Size $3\frac{1}{2}$ by 4 inches. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 40c., $\frac{1}{4}$ lb. \$1.30.

RUBY KING

1066 140 days. Average size $2\frac{1}{2}$ by $4\frac{1}{2}$ inches. Flesh good thickness, mild and sweet. Frequently 20 to 30 large peppers on a plant at one time; when ripe are bright red in color. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 40c., $\frac{1}{4}$ lb. \$1.30.

LARGE BELL, OR BULLNOSE

1068 140 days. A standard sort. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 45c., $\frac{1}{4}$ lb. \$1.25.

SQUASH, OR FLAT

1069 130 days. The variety generally planted for family use. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 40c., $\frac{1}{4}$ lb. \$1.25.

NEAPOLITAN

1070 125 days. One of the earliest peppers in cultivation. A wonderful bearer of uniform fruits, about $3\frac{1}{2}$ inches long by $1\frac{1}{2}$ inches wide; of light green color, changing to brilliant red. Pkt. 10c., $\frac{1}{2}$ oz. 30c., 1 oz. 50c., $\frac{1}{4}$ lb. \$1.50.

Chinese Giant

Perfection Pimento

Royal King

1052

WYOMING WONDER PEA

Introduced in 1933, was bred expressly for the shipper and market gardener who wants a large dark green podded pea which will hold its sweetness after reaching the picking stage. The vine is very dark green reaching a height of 24 to 28 inches depending upon the soil and other conditions. Pods are 5 to $6\frac{1}{2}$ inches long, dark green in color, pointed and slightly curved at the top, pods containing 8 to 10 large peas of unusually fine flavor. Maturity is reached in 75 days. The variety is resistant to Fusarium wilt. Wyoming Wonder remains sweet and tender a week to 10 days after ready to pick. Pkt. 10c., $\frac{1}{2}$ lb. 25c., 1 lb. 35c., 2 lbs. 65c., 7 lbs. \$1.75, 14 lbs. \$3.00.

IMPROVED TELEPHONE

1060 70 days. Remarkably large, dark green pods and Peas attract customers. Pkt. 15c., $\frac{1}{2}$ lb. 25c., 1 lb. 40c., 2 lbs. 65c., postpaid; by freight, pre-paid, 7 lbs. \$1.75, 14 lbs. \$2.75, 56 lbs. \$9.00.

HARRIS' EARLY GIANT

1071 Earliest and most prolific of all the giant peppers; ten days to two weeks earlier than the other large fruited peppers. Quality excellent. Pkt. 15c., $\frac{1}{2}$ oz. 35c., 1 oz. 50c., $\frac{1}{4}$ lb. \$1.50, postpaid.

CAYENNE

1080 Small, long and tapering; very hot; best for seasoning pickles. Pkt. 10c., $\frac{1}{2}$ oz. 30c., 1 oz. 50c., $\frac{1}{4}$ lb. \$1.50.

GREGORY'S SUPERIOR POTATOES

PRICES REPRESENT VALUES AT THE TIME THIS CATALOGUE WENT TO PRESS
AND ARE SUBJECT TO MARKET CHANGES

Price per lb. 30c., 3 lbs. 75c., postpaid, all varieties

For large quantities write for prices — All our potatoes are grown in Maine

Terms on potatoes: Cash with order

Eleven to twelve bushels per acre. One peck will plant 65 to 75 hills. Use one to two tons of potato fertilizer per acre. If you can get stable manure use ten cords per acre.

THE IRISH COBBLER (CERTIFIED)

Leading variety for extra early market. It bears larger sized tubers, is a splendid cropper. This variety is displacing many of the heretofore standard early varieties. Our stock is raised in Maine.

SPAULDING ROSE (CERTIFIED)

Later than the Irish Cobbler, with pinkish skin; a heavy cropper and excellent quality.

GREEN MOUNTAIN (CERTIFIED)

Vines are strong and vigorous. A tremendous cropper with white skin. Quality the best.

RURAL RUSSETT

A superior late variety. Selection from Dibbler's Russet valuable on account of its freedom from disease. It is white, with a russet skin, very regular in size, and unsurpassed for cropping qualities. Eyes are on the surface so there is practically no waste in peeling.

GOLD COIN

We don't see why any farmer with soil in fair condition cannot raise 325 bushels of Gold Coin to the acre. It is white-skinned, and has that rich, russety appearance which is the delight of Potato growers.

NORCROSS

The Norcross is a white Potato. Originated by Charles Norcross, Litchfield, Maine in 1895.

The secretary of the Johnson Seed Potato Co. (E.A. Rogers) writes that from a measured acre they harvested over 550 bushels. In every state from Maine to Minnesota it has been a prize winner, adapting itself to all conditions of soil and climate.

A White Variety, smooth, good size, excellent quality and a heavy cropper.

THE IMPROVED DELAWARE

It is seldom we find such a combination of size, yield and quality in any Potato. It is a medium early; in size it is large, being above the average; skin and flesh are white; in yield it is a remarkable cropper, while in quality it is unsurpassed. It is one of the few varieties that do well on all kinds of soil. There is no potato that has stood so many years and given such universal satisfaction among our customers.

PUMPKINS

CULTURE. In general cultural requirements these differ little from Squashes, for which full directions are given on page 26. However, while Squashes are generally grown as a separate crop, Pumpkins are most of the time planted with Field Corn.

SUGAR

1082 75 days. (SEE ILLUSTRATION). Excellent as a good table delicacy either simply boiled or when entering into the composition of the traditional Pumpkin pie. When fed to cows it enriches the quality and increases the flow of milk, besides imparting to it a rich yellow. Fine grained. Grows to average five pounds; yields enormously; size 8 by 10 inches, weight 6 to 7 lbs. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

LARGE CONNECTICUT FIELD

1088 90 days. Good for stock; usually grown amongst Field Corn; size 18 by 12 inches. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

GOLDEN OBLONG

1089 Very productive. Pumpkins from 15 to 20 inches in length and 8 to 10 inches in diameter. Skin of a rich golden orange, thin but tough, making it almost as good a keeper for winter as the hard shell Squashes. Flesh is light golden yellow of very rich, fine quality — so says the introducer. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

RADISHES

CULTURE. For early use sow in spring as soon as the ground can be worked, in drills 6 to 10 inches apart, covering seed half inch deep. Thin plants an inch apart in the row. As the roots are more succulent and tender when grown quickly a rich, light soil should be preferred, and frequent watering in dry weather will be found beneficial. For a succession, sow every two weeks.

EARLIEST AND FORCING VARIETIES

CRIMSON GIANT

1090 32 days. Quite a new type among Radishes. The Crimson Giant gain a circumference of 5 to 6 inches and a weight of about $1\frac{1}{4}$ to 2 ounces without losing in delicacy and tenderness. When sowing allow plenty of space for their proper development. This novelty combines the advantages of a good hothouse Radish with that of a Summer Radish, and there is certainly a great future in store for it. The roots are quite round, sometimes a little oval. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

SCARLET TURNIP, WHITE TIPPED

1094 28 days. The name defines this elegant new Turnip Radish. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

EARLY WHITE, SHORT-LEAVED

1096 25 days. The best white Turnip for forcing; tops remarkably short. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 45c., lb. \$1.00, postpaid.

FRENCH BREAKFAST

1097 Fine variety of the Olive Radish, scarlet body and white root. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., lb. 85c., postpaid.

RADISHES

Scarlet Globe Radish

SCARLET GLOBE

1092 25 days. (SEE ILLUSTRATION). A most valuable variety for greenhouses, hotbed forcing and outdoors. It stands heat better than any other variety without growing pithy. Sells quicker than any other on account of its bright, scarlet color; extremely early, mild, crisp and tender. Matures ready for bunching in about 25 days. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 85c., postpaid.

SPINACH

CULTURE. For summer use sow early in the spring. in drills 8 inches to 1 foot apart, covering the seed 1 inch deep. Select rich soil and manure very liberally. A succession may be obtained by sowing at intervals of two weeks through the season. For very early spring use, sow in August. The plants are sometimes protected through the winter by a thick covering of straw.

GIANT THICK LEAF

1113 45 days. A fine strain of the Round-leaved. Early quick grower. 1 oz. 10c., $\frac{1}{4}$ lb. 20c., 1 lb. 35c.—postpaid; by freight, prepaid, 10 lbs. \$2.50.

LONG SEASON

1116 60 days. This new variety can be planted at any time during the season; it is slow to run to seed. The leaves are a rich, dark green color, crumpled, and of excellent quality. 1 oz. 10c., $\frac{1}{4}$ lb. 15c., 1 lb. 35c., postpaid; by freight, prepaid, 10 lbs. \$2.50.

NEW ZEALAND

1120 (SEE ILLUSTRATION). New Zealand Spinach should be planted in rows at least 3 feet apart and the plants should be thinned to stand 2 feet apart in the row. They will make a rather spreading growth, each plant "carpeting" 2 to 3 feet. Both leaves and stalks of the plant are very brittle, full of flesh and furnish, when cooked, a Spinach of most delightful quality. Do not plant the seed until May 1. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 75c., postpaid.

PRINCESS JULIAN

1122 A superior new second early variety of long season type most attractive appearance forming a complete rosette. The leaves are of deep dark glossy green and much crumpled. Stands hot weather. Very slow to run to seed. 1 oz. 10c., $\frac{1}{4}$ lb. 15c., 1 lb. 35c., postpaid; by freight, prepaid, 10 lbs. \$3.00.

KING OF DENMARK SPINACH

Plants are ready for cutting with the earlier varieties but remain in good condition two weeks after others have gone to seed. It is a rapid grower, has dark green crumpled thick leaves, keeps crisp and fresh a long time after cutting. 1 oz. 10c., $\frac{1}{4}$ lb. 15c., 1 lb. 35c., postpaid; by freight, prepaid, 10 lbs. \$2.50.

HOME GARDEN MIXTURE

1108 For the man who would like to plant his garden all at once, this Radish mixture offers chances to provide these crisp little delicacies during a long season. We have taken care to include in this mixture small and large kinds, round and long sorts, early and late varieties. From the time the first little round Turnip Radishes are ready to the time that one can enjoy the large summer sorts, this mixture will provide an uninterrupted supply. All sorts included are of very best quality — just right for the home garden. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 85c., postpaid.

ICICLE — Long Varieties

1100 30 days. A handsome, first-class early variety, in color snowy white. It grows to the average length of the long varieties, but holds its fullness well down to the tap-root. Exceedingly attractive and excellent in every way. One of the earliest varieties; nothing equals it for family use. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 85c., postpaid.

CHARTIER OR SHEPARD

1099 45 days. This Radish has rapidly grown into high favor for spring and summer use. It is very handsome, about one third of its length being of a rose color. We find them in our experimental grounds to be as early as Covent Garden. It is very popular among market gardeners. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 85c., postpaid.

SELECTED LONG SCARLET

1101 30 days. A long scarlet tender crisp and sweet. Pkt. 10c., 1 oz. 15c., $\frac{1}{4}$ lb. 25c., 1 lb. 85c., postpaid

GIANT WHITE STUTTGART (Winter)

1104 Very large white summer sort. Resembles small White Egg Turnip. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 30c., 1 lb. \$1.00.

SALSIFY (Vegetable Oyster)

Salsify succeeds best in a light, well enriched soil, which should be stirred to a good depth. Coarse and fresh manure should be avoided, as it will cause the roots to become irregular and branched. Sow early and quite deep, giving the general culture recommended for parsnip. The roots are perfectly hardy and may remain out all winter, but they should be dug early in spring.

1126 MAMMOTH SANDWICH ISLAND. This variety is large and strong, growing with long, smooth, white, tapering roots less likely to branch than those of other sorts. Pkt. 10c., 1 oz. 30c., $\frac{1}{4}$ lb. 75c., 1 lb. \$2.50.

JAPANESE MUSTARD SPINACH

Has a delicious flavor of spinach, mustard and turnip greens combined. Important daily food of the Japanese. Superior to spinach, mustard, turnip greens and Kale in flavor. A quick growing plant ready for table in 3 to 4 weeks. You can produce 9 crops a year. Price per pkt. 5c oz. 10c., $\frac{1}{4}$ lb. 15c., 1 lb. 50c, Postpaid.

BLOOMDALE SAVOY LEAVED Superior Reselected

1110 40 days. Our grower has done considerable work to develop a stock that runs very uniform in shape and color and is true Savoy Leaved. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., 1 lb. 35c., 10 lbs. \$2.50, postpaid; 50 lbs. \$10.00, 100 lbs. \$17.00, freight not paid.

BLOOMDALE SAVOY LEAVED Rust Resisting

1111 45 days. Original stock seed, our grower informs us. came direct from the Virginia Exp. Station. Is absolutely blight resistant. Not suitable for early spring planting because it shoots to seed quickly. Use for fall planting. Pkt. 5c., oz. 10c., $\frac{1}{4}$ lb. 20c., 1 lb. 45c., 10 lb. \$3.00, postpaid; 50 lbs. \$11.00, 100 lb. 20.00, freight not paid,

GREGORY'S FAMOUS SQUASHES

GREGORY'S DELICIOUS

1130 105 days. (SEE ILLUSTRATION). All agree that no Squash brought to the table approaches it in its remarkable combination of fineness and compactness of grain dryness, sweetness and exceeding richness of flavor. It grows to weigh from 5 to 10 pounds, and is in its prime mid-fall and early winter. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 75c., lb. \$2.00, postpaid.

The DELICIOUS by Universal Assent the Best Squash for quality ever produced.

DUNLAP'S EARLY PROLIFIC MARROW

1135 100 days. The standard early of the running varieties. No variety can compete with it for earliness, it being about 12 days ahead of the Boston Marrow. Very productive. Color a brilliant orange red; a good keeper. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

STRICKLER'S GIANT GOLDEN SUMMER CROOKNECK

1146 55 days. This variety of Summer Crookneck we find grows twice as large as the common sort, averaging from 5 to 6 pounds in weight. Size 14 x 4 inches. Pkt. 10c., oz. 15c., $\frac{1}{4}$ lb. 50c., lb. \$1.50, postpaid.

SYMME'S BLUE HUBBARD

1141 125 days. We call it Symmes Blue Hubbard, in honor of Mr. S.S. Symmes, a well-known market gardener who supplied us with our stock seed. A sport from the Hubbard. When first catalogued, it did not come true to color, but by careful selection each season, we hope to fix both color and type. The Symmes Blue Hubbard is entirely distinct from that well-known variety the Marblehead; resembles the Warted Hubbard in shape, though excelling it in flavor and dryness.

More productive than any of the strains of Hubbard. In 1909 we raised two tons from 75 hills, at the rate of 12 tons per acre. We have raised at the rate of 13 tons per acre. Thick meated, fine-grained, dry and very sweet; close your eyes while eating and you would think you were eating cake. Though the Delicious cannot be surpassed in quality, yet it is not the cropper nor is it as long a keeper as the Symmes Blue Hubbard. Our ninth introduction, all things considered, is our best. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. 75c., lb. \$2.50, postpaid.

DES MOINES (Table Queen)

1128 55 days. A small dark green squash acorn-shaped nearly black, 5 to 6 inches long by 4 inches in diameter, weight 2 lbs. Vines vigorous, the ground will be literally covered with squashes of superior quality. Pkt. 10c., oz. 25c., $\frac{1}{4}$ lb. 50c., lb. \$1.75, postpaid.

Gregory's Delicious Squash

GREGORY'S ORIGINAL HUBBARD

1140 120 days. For many years this has been the standard variety of Winter Squash in all sections of the country. The vines are of strong running growth and set the Squashes quite freely. Will develop specimens weighing from 25 to 30 pounds, of an oblong shape, with dark green skin. They keep splendidly, and the flesh is of excellent quality. We have kept up the original standard of this splendid sort, and frankly believe that our strain is the best. Pkt. 10c., $\frac{1}{2}$ oz. 15c., oz. 25c., $\frac{1}{4}$ lb. 50c., lb. \$1.25 postpaid.

Symmes Blue Hubbard Squash

GOLDEN HUBBARD

1144 110 days. A very distinct sort of the shape and general character of the Hubbard, but earlier to mature and of rich orange red color, instead of the dark olive green of the old Hubbard: flesh is a little deeper color. Pkt. 10c., oz. 20c., $\frac{1}{4}$ lb. 45c., lb. \$1.25, postpaid.

SATISFIED CUSTOMERS

Rockledge Farm, Pa.

Your seeds have never failed to prove themselves excellent under average conditions. We have several times tried the seeds from other houses and have always found our profit in price and close supply was over balanced by our loss in germination and poor plants as well as poor production of strong looking plants.

Yours sincerely,

MRS. EDELBERT S. GREGORY.

I am sending a photo of a collection that I entered at the Mount Compass Agricultural Show and secured first honors. You will see that the majority of them the "Gregory Squashes." There was nothing else to be compared with them and they caused a good deal of comment. I want some more this year and put up a better exhibit if possible. "For squashes, Gregory every time."

HORACE E. GREEN,
Tooperang, So. Australia.

SQUASHES — Continued

WARTED HUBBARD

1142 125 days. This variety of the Hubbard is a great favorite with the marketmen. It is very striking in appearance, and has been selected for years from exceptionally large specimens; it crops heavily. It grows to nearly double the average size of the common Hubbard. Our strain was obtained from a market gardener famous for his warty Hubbards. The warty knobs draw general attention. Pkt. 10c., 1 oz. 20c., $\frac{1}{4}$ lb. 50c., 1 lb. \$1.25, postpaid.

THE WARREN

1147 120 days. The Warren (of which we were the original introducers) has a shell generally harder and thicker than the Essex Hybrid, and the color is of a richer and deeper orange, while the quality is decidedly better. The Warren is now grown very extensively by marketmen. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 30c., $\frac{1}{4}$ lb. 75c., 1 lb. \$2.00, postpaid.

Warted Hubbard Squash

Warren Squash

MAMMOTH YELLOW CHILI

1156 120 days. One of the Squashes that draw all eyes at the fairs. Size 20 by 16 inches, weight 50 to 150 bs. Pkt. 10c., 1 oz. 20c., $\frac{1}{4}$ lb. 50c., 1 lb. \$1.50.

GOLDEN SUMMER STRAIGHTNECK SQUASH

1158 Resembles our Giant Strickless Summer Crookneck only with a straight neck. Packs nicer in a box and isn't so apt to break open when handling. Market gardeners have been calling for such a squash for some time. Quality and characteristic the same as the Strickless. Price per pkt, 10c., 1 oz. 20c., $\frac{1}{4}$ lb. 75c., 1 lb. \$1.75, postpaid

GREGORY'S FAMOUS SQUASHES

Squashes have been one of our leading specialties since we started in business, 81 years ago. We have introduced more sorts of real value than any other seedsman. Early and late, small and large kinds, sorts for every climate and every purpose have been evolved by us until the name Gregory has become a synonym for all that is best in Squashes. This collection would be just the thing to raise a fine assortment of Squashes for the fair. Symmes' Blue Hubbard, Gregory's Delicious, Warren, Hubbard, Golden Straight Neck Summer, and Victor.

VICTOR SQUASH

(SEE ILLUSTRATION)

1145 This squash, which we were the first to catalog, is of a rich orange-yellow color, generally with a hard shell thickly covered with warts. Thick meated, and quality excellent during its season, from September till December. About as early as the Marrow, a tremendous cropper. Where this squash is placed on exhibition it attracts the attention of every one on account of its rich color and attractive appearance. Pkt. 10c., 1 oz. 30c., $\frac{1}{4}$ lb. \$1.00, 1 lb. \$2.75, postpaid.

Victor Squash

TOMATOES

CULTURE. Sow the seed in March and April in the hotbed, or in pots in a sunny exposure in the house. If it is desired to make very healthy, stocky plants, they may be transplanted or repotted when about 2 or 3 inches high. When 5 or 6 inches high, if the ground has become warm, transplant to the open ground on a rainy or cloudy day if possible; if not, the young plants should be liberally watered and shaded from the hot sun. If it is desirable to have the fruit ripen as early as possible, in preference to a heavy crop, select rather light, poor soil and a sunny location. Trimming off the laterals, training to a stake and propagating by slips are believed by many to promote earliness. Set the plants 4 feet apart each way, upon mounds of earth to allow the foliage to open and let the sun in among the fruit. A cheap trellis, made by driving three stakes around the plants and encircling them with three or four barrel hoops, makes a very nice support for training them. One ounce of seed for about 1,200 plants.

BRIGHT RED SORTS

BONNY BEST

1161 130 days. An Extra Early Tomato. A splendid variety for forcing. They are uniform in size and shape, smooth, bright scarlet color. Plants are very productive. A good shipper. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 35c., $\frac{1}{4}$ lb. \$1.00.

CHALK'S EARLY JEWEL

1162 130 days. Vines vigorous and very productive. Fruit deep scarlet red, nearly round, smooth, large size, of excellent quality, early, and continues through till frost. Productive. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 35c.,

PONDEROSA

1163 150 days. (The Tomato Giant). This seems to be the favorite large-fruited variety. Vines are of strong growth. Some reach one pound in weight. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 45c., $\frac{1}{4}$ lb. \$1.25.

PENN STATE TOMATO

1166 Originated by Dr. C. E. Meyers, Plant Breeding Expert. Plant in rows 3 feet apart and plants set 27 inches apart in the row. Foliage is medium dark green, and covers the fruit well. Its fruit is formed in clusters. The fruits are perfectly and evenly colored a rich scarlet. Extremely early maturing almost as early as Earliana and is far superior to that variety in shape and yield. The shape is almost spherical and the interior of the fruit is a dark red with very little core. Very few seeds. Total yield of more than 20 tons to the acre is possible. Pkt. 10c each.

STONE

1164 150 days. A standard late variety. It is very large and of bright scarlet color, spherical in shape, very smooth, ripens evenly to the stem, exceedingly solid and firm fleshed. Not subject to rot. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 35c., $\frac{1}{4}$ lb. \$1.00.

BREAK O'DAY TOMATO

1165 This new tomato is the result of a cross between Marviana and Marglobe. It retains the vigor of vine and globe shape of the Marglobe combined with the earliness and solid fruit of the Earliana class 10 days earlier than Marglobe. Particularly popular in sections where the vines are staked and there is a demand for early fruit of good size and shape.

The fruit is as round and smooth as an apple, and deep orange red in color. The flesh is deep red and solid with thick walls and few seeds.

Pkt. 10c., 1 oz. 40c., $\frac{1}{4}$ lb. \$1.00.

DWARF CHAMPION

1182 150 days. Plant upright, fruit perfectly round and brilliant purple. Medium size borne in clusters. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 35c., $\frac{1}{4}$ lb. \$1.00.

PRITCHARD (Scarlet Topper)

1168 Product of U. S. Dept. of Agriculture, developed by the late Dr. Pritchard. Midseason variety, heavy yielder. Deep scarlet globe shaped, solid and smooth. Wilt resistant, is popular in the South on account of its shipping qualities. Pkt. 10c., oz. 40c., $\frac{1}{4}$ lb. \$1.00.

BURBANK TOMATO

The following is Mr. Burbank's personal introductory claims:

"By far the earliest, smoothest, solidest, most productive and best of all early tomatoes; resists wilt and other tomato diseases better than most others."

1169 Color bright red, same as "Stone." Pkt. 15c., 2 pkts. 25c., $\frac{1}{2}$ oz. 65c., 1 oz. \$1.00.

NEW GLOBE

1170 125 days. A rose colored variety. Comes true to type. Round, splendid cropper, very early, unsurpassed in quality. Pkt. 10c., $\frac{1}{2}$ oz. 25c., 1 oz. 45c., $\frac{1}{4}$ lb. \$1.20.

JOHN BAER

1173 125 days. The introducer claims: "John Baer Tomato produces large, solid, shipping fruit in 30 days, 50 to 100 fruit to each plant; ripens evenly up to the stem, does not scald, blight or crack; bright red color, a delightful flavor, almost seedless, often ten fruits in a cluster, solid and meaty. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 45c., $\frac{1}{4}$ lb. \$1.20.

(SEE ILLUSTRATION)

John Baer Tomato

EARLIANA

1167 Extra early tomato with a smooth scarlet red skin. The compact vines carry an enormous crop. Likes a sandy loam with plenty of moisture. The crop may be harvested in three weeks. Quality excellent. Pkt. 10c., $\frac{1}{2}$ oz. 25c., oz. 40c., $\frac{1}{4}$ lb. \$1.00.

SPRAYING TOMATOES

In the last three years considerable damage has been done by disease. By careful spraying with Bordeaux Mixture, starting early in the season and keeping the plants well covered with spray throughout the season, the disease can be kept under control, although it isn't a sure cure.

MARGLOBE TOMATO

1180 One of our most attractive second early tomatoes averaging larger than Bonny Best, a bright scarlet, solid meated, globe shape, showed no signs of rust and wilt, so it can be called a rust resisting variety. It is bound to be a valuable tomato for canning. Pkt. 10c., $\frac{1}{2}$ oz. 20c., 1 oz. 35c., $\frac{1}{4}$ lb. \$1.00, 1 lb. \$3.50, postpaid.

TURNIPS

CULTURE. For early use sow the small sort as soon as the ground can be worked in the spring, in drills 14 in. apart, the Ruta-Baga 30 inches. As the seed is very fine, it should be covered but slightly. Select light, if possible new, soil, and manure with ashes of phosphates. Should the young plants be troubled with insects a sprinkling of plaster will be found beneficial. Of the early varieties, thin the plants to 6 inches apart, and the Ruta-Baga to 1 foot. For fall and winter the early kinds should be sown from the middle of July to the middle of August, and the Ruta-Bagas from the middle of June to the first of July, using 1 ½ lbs. of seed to the acre. "Swede" and "Ruta-Baga" being synonymous terms, the names below, given as they are generally used, will be readily understood. The English varieties are almost exclusively used for early planting for market. For fall and early winter use we recommend the English Turnips, while for late winter and spring the Ruta-Baga will prove the better keepers.

WHITE AND YELLOW TURNIPS

EXTRA EARLY WHITE MILAN

1190 40 days. Decidedly the earliest of the Turnip family. Very uniform in shape and superior in quality. 1 oz. 10c., ¼ lb. 35c., 1 lb. \$1.00.

EXTRA EARLY PURPLE TOP MILAN

1192 45 days. Earliest Red Top Flat Turnip in cultivation, of the strap-leaved class, flat in shape and of excellent quality. 1 oz. 10c., ¼ lb. 35c., 1 lb. \$1.00, post paid.

GOLDEN STONE

1194 50 days. If our customers want a fine yellow-fleshed variety that is not a Swede, try the Golden Stone. It is early, about the size of the White Egg, very attractive in color and of fine quality, oblong in shape. 1 oz. 10c., ¼ lb. 25c., 1 lb. 75c.

WHITE EGG

1196 70 days. Six hundred bushels of this fine Turnip have been raised to the acre as a second crop, bringing the market gardener two hundred dollars. It is perfectly smooth, of a pure, clear white, growing half out of the ground. A very choice kind for table use, of excellent flavor, sweet and mild. It pulls clean from the ground, and is a first-rate keeper for winter use. Our stock is from headquarters. Comes to size for use just after Early Red Top. 1 oz. 10c., ¼ lb. 25c., 1 lb. 75c., postpaid.

LONG WHITE COWHORN

1214 60 days. A very fine strain; matures quickly; carrot-shaped, fine and sweet. 1 oz. 10c., ¼ lb. 25c., 1 lb. 75c., postpaid.

PURPLE TOP GLOBE

1200 70 days. Contesting the field, with Red Top, a thick, round, quick-growing white variety. 1 oz. 10c., ¼ lb. 25c., 1 lb. 75c., postpaid.

IMPROVED YELLOW GLOBE

1204 70 days. Fine for family use or field culture. An American variety. Oz. 10c., ¼ lb. 25c., lb. 85c., postpaid.

GREEN TOP ABERDEEN

1206 Round, yellow-fleshed and firm. A good keeper. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

Ruta-Bagas or Swedish Turnips

LAING'S IMPROVED SWEDE

1218 One of the earliest; handsome round variety; fine for the table. Oz. 10c., ¼ lb. 25c., lb. 75c., post paid.

SWEET GERMAN OR RUSSIAN

1238 White, sweet, excellent; a first-rate keeper. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

AMERICAN RUTA-BAGA

1220 90 days. Farmers and gardeners have found this to be one of the best varieties for either marketing or raising for stock feeding. Slightly oblong or nearly globe shaped, yellow flesh solid texture of superior quality small top. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

Extra Early Purple Top Milan Turnip

ELEPHANT, OR MONARCH SWEDE TURNIP

1222 90 days. This excellent Swede Turnip is one of the heaviest cropping varieties in cultivation. It is of the tankard shape, so that it can be left thicker in the rows than other varieties. Tested side by side with leading kinds, it proved to be superior in some instances giving as much as 10 tons or more per acre. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

UNIVERSAL SWEDE

1225 90 days. The largest of the round, purple top, yellow-fleshed varieties. Is particularly hardy, withstanding both drought and mildew. A certain and heavy cropper. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

SKIRVING'S PURPLE TOP RUTA-BAGA

1226 Standard field variety; fine for family use; yellow fleshed. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

BUDLONG'S WHITE ROCK

1232 90 days. An American white Ruta-Baga, earlier and rounder than any other white variety, very sweet and of a mild flavor. Less apt to grow hollow. Oz. 10c., ¼ lb. 25c., lb. 75c., postpaid.

GREGORY SEEDS GIVE RESULTS

I am writing to inform you that three generations of my family have bought seed of Gregory covering a period of over 65 years which in my mind is some time to patronize one firm but we have always found seeds as represented and look forward each year for Gregory's catalogue.

F. M. HARDY, East Andover.

GREGORY'S HONEST FLOWER SEEDS

We remind our friends that Flower Seeds, usually being very small, require extreme care in the preparation of the soil, depth of planting and protection from extreme cold and wet. Do not plant in open ground before the weather has become settled, usually about the middle of May. The soil should be made very fine and well enriched. It facilitates germination if a newspaper is spread over the surface after planting.

In our Flower Seed section, which follows, the letter (A), following the name of varieties indicates Annuals; (B), Biennials; (P), Perennials; C, in combination with any of

these letters, signifies Climbing Plants, thus: (AC) stands for Annual Climbers, etc.

Annuals grow, bloom and die the first year from seed. Biennials bloom the second year from seed, then die, though many, if sown early in the spring, will flower the first year. Perennials usually bloom the second year from seed and continue to grow and bloom for many years. Some will also bloom the first year if sown early.

All Flower Seeds are sent by Mail, postpaid, on receipt of Price.

ACHILLEA (P)

1402 *Ptarmica*, The Pearl (Sneezewort). (SEE ILLUSTRATION). Bears a profusion of large, double, white flowers in cluster from spring till frost, much prized for cutting, 2 feet. Pkt. .15

1403 *Millefolium fl. rubro*. Flowers rosy red, useful for borders, and valuable for cutting. Pkt. .15

ACONITUM. Monks' Hood (P)

1404 Grows well in any good soil, even when in the shade Pkt. .10

ACROCLINIUM. (A)

1405 *Roseum*, Double and Single, Mixed. 2 feet. Beautiful, everlasting flowers. In dry state valuable for winter decoration. Pkt. .10

AGERATUM (A)

1410 *Little Dorrit*, Azure Blue. 6 inches. A fine bedding plant covered with feathery blue flowers from early summer till frost. Valuable for pots. Pkt. .10

1011 *Blue Perfection*, 8 inches. Large heads of deep amethyst-blue flowers. $\frac{1}{4}$ oz. 40c. Pkt. .10

AGROSTEMMIA CORONARIA (P)

1412 Mixed. 1 foot. Beautiful, free-flowering perennial, producing throughout the season bright white and red flowers. Pkt. .10

ALYSSUM, SWEET (A)

Excellent for beds, edgings, etc. Fine for bouquets.

1414 *Little Gem*. 4 inches. Dwarf and compact, with plants a mass of white from spring until frost. $\frac{1}{4}$ oz. 25c., $\frac{1}{2}$ oz. 40c. Pkt. .10

1416 *White*. $\frac{1}{2}$ oz. 20c., 1 oz. 30c. Pkt. .10

1417 *Lilac Queen* (Compactum). Flowers open white turning to a pleasing shade of light lavender—6 inches. $\frac{1}{4}$ oz. 30c. Pkt. .10

1418 *Saxatile*. Compactum (Hardy) 1 foot. Beautiful Spring-blooming variety, with flowers of a deep, pure yellow. A good rock plant. $\frac{1}{4}$ oz. 40c. Pkt. .10

ABUTILON. Flowering Maple

1423. Mixed. Contains many new colors. Pkt. .15

ARABIS. Rock Cress (P)

1432 *Alpina*. 6 inches. For bedding and rocks. Blooming early, the white flowers make a pleasing contrast with *Alyssum saxatile*. $\frac{1}{4}$ oz. 25c. Pkt. .10

Achillea

ANCHUSA (P)

1424 *Italica grandiflora*. 5 feet. (Dropmore Variety) Hardy. May to August with intense blue Forget-Me-Not-like flowers, effective in beds. Pkt. .15

1424 $\frac{1}{2}$ *Blue Bird* (Annual). Lovely bright blue Forget-Me-Not flowers, 18 inches. Pkt. .15

ARCTOTIS (A)

1425 *African Daisy*. 2 feet. Large, pearly white flowers, mauve center with gold band. Pkt. .10

ARMERIA (P)

1426 *Formosa Hybridis*. 9 inches. Sea Pink. Flowers on slender stems, shades from flesh color, lilac, carmine rosy carmine to crimson. For beds and borders Pkt. .15

AMMOBIUM (Annual)

1430 *Alatum grandiflorum*. Large white flowering variety. $\frac{1}{4}$ oz. 25c. Pkt. .10

GREGORY'S SUPERB ASTERS

Sow seed early in the spring under glass, or in boxes in the house, transplanting into rich soil one foot apart.

The varieties we offer, were grown under ideal conditions and cannot be surpassed in size form and colorings.

ASTERMUM ASTERS

On account of their size have the appearance of Chrysanthemums. Earlier than Crego Giant.

1433 *White*. Purest white. Pkt. .10

1434 *Pink*. Lovely rose pink. Pkt. .10

1435 *Lavender*. A beautiful shade. Pkt. .10

1437 *Mixed*. All the above colors. Pkt. .10

GIANT MERITORIOUS PINK ASTER

The most beautiful flesh pink aster in cultivation, enormous in size with very long straight stems. It is a branching variety, grows about 2 $\frac{1}{4}$ feet high, very strong trunk, flower 4 $\frac{1}{4}$ inches across. It will produce 12 to 15 larger sized blooms than those ever appeared on the market. For commercial purpose there is no other flower that can duplicate it for size, color and stem. A mid-season variety. Pkt. 15c., 2 pkgs. 25c.

Asterium Aster

Meritorious Aster

GREGORY'S SUPERB LATE BRANCHING ASTERS

Of American origin, have become thoroughly acclimated, selected with the greatest care. Their extremely long stems make them ideal for cutting and bouquets. They fill in a gap between the early flowering varieties and Chrysanthemums.

DOUBLE SWEET SCENTED NASTURTium GOLDEN GLEAM

1824 The plant forms a vigorous large bush which throws out short runners averaging eighteen inches. The flowers commence to come as soon as the plant nears complete development and the time it is in full bloom the entire plant, including the runners, is a blaze of color. The large, golden-yellow flowers average two and one-half to three inches across. Pkt. 10c., oz. 20c., ¼ lb. 50c.

Lupins

Marigold

NASTURTium**Double Gleam Hybrids Finest Mixed**

1825 The flowers are fine, large, well-formed, sweet-scented doubles of the same type as the well-known Golden Gleam. In habit of growth closely resembles it. Free-flowering bushes. The flower stems are long and bear the flowers well above foliage. The color range includes an evenly balanced blend of a glorious assortment of brilliant shades. Pkt. 15c. each.

PANSY

Our Seed is obtained from growers who make a Specialty of Pansies, and are confident that for varied coloring and size they cannot be excelled. Manure heavily with old cow manure. Rake very fine and have rows a foot apart; thin plants to 6 inches in the row. For spring flowering, sow in August, and lightly protect during winter.

1864 Giant Yellow, Spotted. A variety of the fine-blotched Cassier tribe; flowers large, golden yellow, with a dark blotch on each petal..... .20

1866 Masterpiece. A new type, the border of every petal being undulated and curled. Flowers are very large. Some tints of color not seen in other Pansies... .20

1870 Emperor Frederick. Deep purple, golden bronze center, edged scarlet and yellow. ¼ oz. \$1.25, pkt. 20c.

1874 Trimardeau, or Giant Pansies. Mixed. Distinct and splendid race of vigorous and compact growth. Flowers of immense size..... .15

1876 Trimardeau Striped. Extra large flowers, very fine..... .15

1878 Trimardeau, Giant Yellow. Beautiful..... .15

1896 Gregory's Giants. A Choice Special Mixture contains selections from a great many of the giant varieties. Colors in all shades, spotted and blotched, striped, bronzed, marbled and ruffled. ⅛ oz. .60c, ¼ oz. \$1.75, ½ oz. \$3.00, pkt. .20

“Marvelous” Double Petunia

“MARVELOUS” DOUBLE PETUNIA

1898 Our new Double Petunia. Never have been surpassed in beauty, size, form or color, if ever equaled. Selection in crossing every flower was made with the greatest care and thought, and the results are a surprise even to ourselves.

Many of the flowers measure 5 inches across, none less than 3. They are fluted, frilled, ruffed and pinked. The combinations of color are exceedingly strange and beautiful. Proportion of double flowers is greater than any we have ever seen. Pkt. 20c., 2 pkts. 35c.

NEW CARNATION FLOWERED PETUNIA
(DOUBLE MIXED)

1899 This charming plant will find immediate favor with both florist and gardener. Erect habit; free blooming, fluted flower of all shades, pink predominating. Fine for potting and for mixed border. Pkt. 15c., 3 pkts. 35c.

PETUNIA (P)

- 1900 Giant Fluffy Ruffles. Window, boxed and for bedding. (Single). The most delicate ruffled and fringed of all petunias, slightly smaller than the Giants of California, but more ruffled. Mixed Colors..... .20
- 1900 A Purple Queen (New). Plants erect. Flowers large and very attractive, glossy crimson purple. .20
- 1905 Large flowered, Fringed, Double Varieties. Finest Mixed. Strong and compact growth, flowers in the finest shades.25
- 1906 Hybrida Purpurea. Deep purple.20
- 1906 A Hybrida Maculata. Beautifully striped and blotched crimson and white.15
- 1908 Single Fringed.20
- 1910 FINE MIXED..... .10
- 1912 Giants of California. Flowers very large, in every conceivable shade of crimson, white, violet, lavender, etc.20
- 1914 Howard's New Star. Dark crimson maroon, rich, velvety texture and clearly defined five-rayed star of bluish white. Over eighty per cent from seed will produce star markings.10
- 1915 Rosy Morn. Soft carmine pink, with white throat; makes a very dainty and effective border10

BALCONY PETUNIA

Becoming very popular on account of its luxuriant growth and freely branching habit, with its great profusion and persistent bloom, making it valuable for window decorating, piazza boxes and balconies.

1901 Rose, 1903 White, 1904 Dark Red, 1907 Velvety Blue, 1907-A Mixed. Pkt. each, 15c.

PENTSETEMON SENSATION
IMPROVED

An excellent mixture of an improved strain of French Hybrids. A tall grower and very floriferous; flowers large and well marked; very showy. Gloxinia like flower of varying colors. Perennial, in warmer localities excellent for cutting purposes. 30 inches high. Pkt. 15c.

Nitrophoska. A complete fertilizer for house plants; quick acting. Page 48.

Express not prepaid, Postage to be added.

Nitrophoska contains all of the three essential plant-foods — 15 percent of nitrogen, 30 percent of phosphoric acid and 15 percent of potash — all of which is soluble and easily available. Ideal food for house plants.

Five to ten pounds of Nitrophoska (depending upon the natural richness of the soil) is enough to fertilize 1000 square feet of lawn or garden.

Prices, Express not paid: 1 lb. 25c., 5 lbs. 90c., 10 lbs. \$1.50, 25 lbs. \$2.75.

SOWRITE SEED SOWER SOWS SEEDS AT A TOUCH

Model 1923, made of copper nickel plated for all sizes seed up to peas. Scatters seeds individually. You can see seed as it drops. Even distribution eliminates guess work. Price 55c. post paid.

SHEEP MANURE

For the Lawn: Apply Sheep's Head Manure at the rate of one pound to every 10 square feet.

For making a liquid, take one pound to five gallons of water, which can be used daily, if necessary.

Feed the Flowers: Flowers, as well as vegetables, need feeding. This is particularly true of Roses.

In potting plants, mix 1 handful with two pound of soil.

Prices: 5 lbs. 30c., 10 lbs. 55c., 50 lbs. \$1.75, 100 lbs., \$3.00. We do not pay express or freight. Price by ton given on application.
